The Insect Folk:

The Insect Folk Margaret Warner Morley,2015-12-27 Margaret Warner Morley February 17 1858 in Montrose Iowa December 12 1923 in Washington D C was an American educator biologist and writer author of many books on nature and biology for children and novel writer Excerpt When the dragon fly larva first hatches it is very small and its legs are rather long and spidery but it eats and eats and eats my how it eats And it grows and grows and one day it finds its skin too tight A tight skin must be rather uncomfortable But the larva does not care much for its skin It merely splits it open down the back and pulls itself out Perhaps you think it must be yet more uncomfortable to be without a skin But it is not without a skin It is covered by a new and soft one that soon hardens and that is larger than the old one It wriggles out of its old skin as though it were an old coat and leaves it clinging to the weeds in the pond Sometime you may find these cast off dragon fly overcoats After it has shed its skin the dragon fly continues to grow Excerpt from Wikipedia
