Neo-Confucianism and Science in Korea Sang-ho Ro,2021-02-15 Historians of late premodern Korea have tended to regard it as a hermit kingdom isolated from its neighbours and the wider world In fact as Ro argues in this book Korean intellectuals were heavily influenced by both Chinese Neo Confucianism and the European Enlightenment in the late 18th and 19th centuries In the late Choson period the regime felt threatened by the new more empirical approaches to knowledge emerging from both the East and the West For this reason many Korean intellectuals felt it necessary to work in the shadows and formed secret societies for the study of nature Because of the secrecy of these societies much of their work has remained unknown even in Korea until recent years Ho looks at the work of these intellectuals and analyses the impact their thinking and experimentation had on knowledge production in Korea A fascinating insight into the largely overlooked story of how globalization affected intellectual life in Korea before the 20th century This book will be of great interest to students and researchers of Korean history and of Asian intellectual history more broadly CULTURE OF NAMES IN AFRICA Emma Umana Clasberry,2012-01-12 INTRODUCTION Personal name is a vital aspect of cultural identity As a child you may have loved or hated your name But you were rarely indifferent to it What s in a name Shakespeare asked That which we call a rose by any other name would smell as sweet he explained Perhaps in England or somewhere else in Europe but not in Africa Personal names in African have meanings can affect personality hinder or enhance life initiatives They serve to establish a connection between name and cultural background and thus provide some information about cultural affinity and more such as express one s spirituality philosophy of life political or socio economic status as defined by a given ethnic cleavage African names tell stories convert abstract ideas to stories and tell story of the story about different aspects of one s life They commemorate any unusual circumstance the family or community once experienced or world event that took place around the time of a child s birth Outside a given cultural environment names boost and nurture cultural pride and identity showcase a people s appreciation of their culture and their readiness to defend and live their culture with pride and dignity Naming practices that tell histories behind the names were the norms in Nigeria Ibibio and in fact in Africa until the encroachment of two historical forces in Africans affairs Christianization and colonization more than any other forces in history shattered the connection between personal name and cultural affinity and have ever since contributed to the gradual erosion of African culture of names On the continent the combined efforts of their human agents the missionaries and British colonial personnel

directly and indirectly through their policies and practices caused African Nigerians to give up their culture relevant names in favor of foreign ones Apart from direct erosion of culture of names colonial administration a term I use mostly to refer to the combined efforts of the missionaries and British colonial personnel in Nigeria abrogated many religious socio economic and political traditions which were intimately intertwined with the people s naming practices Their attempt to replace African traditions with European ones through coercing Africans to accept Western values and beliefs consequently disabled many desirable African traditional structures including authentic African naming practices and caused some to fall into disuse A third force was early European African trade Although the impact of the presence of European merchants in Nigeria was minimal in this regard some of their activities have also left a dent on African naming practices by introducing foreign bodies into the people s names database Even though these alien forces invaded and injected foreign values into Africa over a century ago their impact on naming practices continues to be felt by Africans European intrusion in relation to African naming practices did not end on the continent The Trans Atlantic Trade on human cargo was another major historical event that did not only forcefully disconnect many Africans from their cultural root and natural habitat but also mutilated authentic African naming practices among them Consequently Africans in Diaspora had European names imposed upon them by their slave masters Today many Africans on the continent and in Diaspora continue to carry names which are foreign names whose meanings they do not know names the bearers can not even pronounce correctly in some ethnic contexts and names which have no relevance to nor any form of link with the bearers cultural background In effect culture of names as many other African customary practices has lost its savor Some peoples of African descent still cherish these colonized names Some do not and are making practical efforts to reclaim authentic African cul

Secret Languages of Afghanistan and Their Speakers Jadwiga Pstrusińska, 2014-07-18 This is a study of an almost inaccessible area of the intricate linguistic fabric of Afghanistan namely its secret codes of communication The text draws on a profound knowledge of Afghanistan and neighbouring regions as well as the cultural and sociolinguistic processes at work across Eurasia The author situates these sociolinguistic matters within the appropriate diachronic and

comparative background and traces the numerous threads which connect them to areas both close to and distant from Afghanistan The book will be of great interest to scholars from a wide range of disciplines including but extending beyond the realms of linguistics cultural history and sociology It will also be of practical value in many areas notably with regards to military and political issues as well as humanitarian aid Literature 1984, Part 1 S. Translation/re-Creation Duncan Poupard, 2021-11-29 This book is a study of European language translations of Naxi ritual manuscripts the ritual literature of a small ethnic group living in southwest China s Yunnan Province The author discusses the translations into European languages in English French and German from the late nineteenth century to the second half of the twentieth century revealing a history of fragmentary yet interconnected translation efforts in the West By exploring this network he shows how translation can be understood as a metonymic recreation of textual worlds As Naxi manuscripts are semi oral texts representing an oral formulaic tradition their translation involves a metonymic relay of partial incorporations from manuscript image to reading spoken language Therefore the book engages in a series of textual excavations to uncover the previously occluded contemporaneous readings that would have led to the translations we can consult today particularly in an attempt to understand how the Naxi literature came to be part of Ezra Pound s Cantos Scholars in the field of ethnic minority literature in China and translation studies will find this book beneficial and it will make new contributions to comparative literature between the East and West Korean Religions in Relation Anselm K. Min, 2016-09-30 Examines Buddhism Confucianism and Christianity in Korea focusing on their mutual accommodation exclusion conflict and assimilation Instead of simply being another survey of the three dominant religions in contemporary Korea Buddhism Confucianism and Christianity this unique book studies them in relation to each other in terms of assimilation accommodation conflict and exclusion The contributors focus on major issues that have historically challenged the relations between the three religions from the Goryeo period to the present and how each religion has responded to them The essays bring a new perspective to the study of Korean religions one that is especially pertinent in the current age of religious pluralism with all its tensions *Official Gazette of the United States Patent and Trademark Office* ,2003
