sexuality mafia mythologies and politics In addition the companion clearly shows that no national cinema develops in isolation and that cinema is a truly global popular art form This important guide to the gangster film genre Reveals how the gangster film engages in complex and contradictory themes Examines the changing face of the gangster film in America Explores the ideas of gangsterism and migration in the Hispanic USA Latin America and the Caribbean Discusses the wide variety of gangster types to appear in European cinema Contains a review of a wide range of gangster films from the Americans Europe and Asia Written for academics and students of film A Companion to the Gangster Film offers a scholarly and authoritative guide exploring the various aspects and international appeal of the gangster film genre Criminality and Business Strategy John Zinkin,Chris Bennett,2022-10-03 Criminality and Business Strategy Similarities and Differences explores what can be learned from criminal organizations on four continents based on comparisons of their historical and cultural origins chosen governance and power structures and business models It discusses how these contexts determined their applications of the principles and practice of effective but amoral leadership and whether these lessons can be applied to legitimate business enterprises In this book John Zinkin and Chris Bennett argue that defining a crime is a contested issue and that criminality can be viewed as a spectrum comprising a range of different types of crimes the harms caused and the variety of punishments involved They discuss the critical role of the state in determining where criminality is perceived to sit on the crime continuum The authors delve into how the state and organized crime are natural competitors and how organized crime and legitimate businesses are subject to many of the same internal and external strategic considerations They contend that the resulting similarities between criminality in organized criminal organizations and legitimate businesses are greater than the differences and that the differences are only in degree and not in kind This thought provoking study of criminality will be of immense interest to professionals coaches consultants and academics interested in the techniques and ethics of leadership The book is in effect the result of an intellectual journey of the authors from the ideas presented in their earlier book The Principles and Practice of Effective Leadership to the issues in this book discussing important difficult and contested subjects The journey continues in their third book The Challenge in Leading Ethical and Successful Organizations Mafia Organizations Maurizio Catino,2019-02-07 How do mafias work How do they recruit people control members conduct legal and illegal business and use violence Why do they establish such a complex mix of rituals rules and codes of conduct And how do they differ Why do some mafias commit many more murders than others This book makes sense of mafias as organizations via a collative analysis of historical accounts official data investigative sources and interviews Catino presents a comparative study of seven mafias around the world from three Italian mafias to the American Cosa Nostra Japanese Yakuza Chinese Triads and Russian mafia He identifies the organizational architecture that characterizes these criminal groups and relates different organizational models to the use of violence Furthermore he advances a theory on the specific functionality of mafia rules and discusses the major organizational dilemmas that mafias

face This book shows that understanding the organizational logic of mafias is an indispensable step in confronting them

Understanding Insurgent Resilience Andrew Henshaw, 2020-07-30 This book examines terrorist and insurgent organisations and seeks to understand how such groups persist for so long while introducing a new strategic doctrine for countering these organisations The work discusses whether familial or meritocratic insurgencies are more resilient to counterinsurgency pressures It argues that it is not the type of organization that determines resilience but rather the efficiency functions of social capital and trust which have different natures and forms within them It finds that while familial insurgencies can challenge incumbents from the start they weaken over time whereas meritocracies will generally strengthen The book examines four of the most enduring and lethal insurgent organizations the Haqqani Network in Afghanistan Lashkar e Taiba in Pakistan Jemaah Islamiyah in Indonesia and the Abu Sayyaf in the Philippines The author breaks down each group into its formative strengths and vulnerabilities and presents a bespoke model of strategic counterintelligence that can be used to manipulate degrade and destroy each organization This book will be of much interest to students of counterinsurgency terrorism intelligence security and defence studies in general **Casino Industry in Asia**
