

# THE INTERVIEW

Last week, John Davison went for an interview. He was wearing his best suit; he was looking pretty good and he felt confident. He knew the job was right for him and he thought he was a good candidate. There were three people on the interview panel. The interview took place on the top floor of a big office block. The questions about the job were easy! John had answers for them all. Then came the usual: what is your best quality? John replied truthfully that he was extremely well organised. The interviewers were pleased and nodded their heads in approval. Then they asked him what his worst quality was. John answered honestly: 'My worst quality is my honesty' he said. The interviewers looked at each other and smiled. The one in the middle said, 'I think honesty is an excellent quality Mr Davison and I am delighted you are honest'.

'I don't really care what you think,' answered John.

Answer the following questions:

1. When did John go for his interview?
2. What was he wearing?
3. How did he feel?
4. Did he think he was suitable for the job?
5. How many people interviewed him?
6. Where did the interview take place?
7. Did they ask him any difficult questions about the job?
8. What question is 'the usual'?
9. What is John's best quality?
10. What is the opposite of that question?
11. Which interviewer said that honesty is a good thing?
12. Did John's final answer surprise you?

*\*Did you enjoy the joke? \*What are YOUR best and worst qualities?*

*\*Should you always be truthful? Can you think of any situations when it is a good idea to be a bit untruthful and tell white lies?*

**Testing Second Language Speaking** Glenn Fulcher, 2014-10-13

The testing and assessment of second language learners is an essential part of the language learning process. Glenn Fulcher's *Testing Second Language Speaking* is a state-of-the-art volume that considers the assessment of speaking from historical, theoretical, and practical perspectives. The book offers the first systematic, comprehensive, and up-to-date treatment of the testing of second language speaking. Written in a clear and accessible manner, it covers explanations of the process of test design, costing test design projects, how to put the test into practice, evaluation of speaking tests, task types for testing speaking, testing learners with disabilities. It also contains a wealth of examples, including task types that are commonly used in speaking tests, approaches to researching speaking tests, and specific methodologies that teachers, students, and test developers may use in their own projects. Successfully integrating practice and theory, this book demystifies the process of testing speaking and provides a thorough treatment of the key ethical and technical issues in speaking evaluation.

**Pattern Practice in the Teaching of Standard English to Students with a Non-standard Dialect** San-su Chen Lin, 1965

**Chinese as a Second Language Assessment** Dongbo Zhang, Chin-Hsi Lin, 2017-04-12. This book brings together 13 original research papers that address emerging issues in the assessment of Chinese as a Second Language (CSL) in five major areas, including standards in CSL assessment, development of CSL tests, assessment of diverse knowledge and skills, computer-supported assessment, and CSL assessment in relation to instruction and teachers' assessment competence. It goes beyond the psychometric testing of Chinese and provides cutting-edge examinations of the interfaces of assessment with sociology of language acquisition, pedagogy, and modern technologies, as well as teacher education. Given its unique features and broad range of topics, the book offers an intriguing and valuable resource not only for scholars and researchers but also for teacher educators and assessment practitioners who are directly or indirectly involved in CSL assessment.

**The Sociocultural Activity of High Stakes Standardised Language Testing** Dawn Karen Booth, 2018-02-26. This book explores the influence of high-stakes standardised testing within the context of South Korea. South Korea is regarded as a shining example of success in educational achievement, and as this book reveals, pressurised standardised testing has been a major contributing factor to its success. This unique country provides an excellent setting from which to explore the powerful relationship that exists between testing and learning, and can advance our understanding of which factors and test conditions will positively and negatively influence learning. This book follows the test activity of a group of Korean university students preparing for the TOEIC Test of English for International Communication and posits a revised model of the influence of testing on learning. It calls for a more socially situated view of tests and test takers, considered in relation to the sociocultural, historical, political, and economic contexts in which they are embedded.

Eisenstein,2013-06-29 Recent work in applied linguistics has expanded our understanding of the rule governed nature of language The concept of an idealized speaker hearer whose linguistic competence is abstract and separate from reality has been enriched by the notion of an actual interlocutor who possesses communicative competence a knowledge of language which accounts for its use in real world contexts Areas of variation previously relegated to idiosyncratic differences in performance have been found to be dynamic yet consistent and lend themselves to study and systematic description Because language acquisition involves the development of communicative competence by its very nature it incorporates variation and systematicity Second language acquisition is similarly variable since interlanguage is subject to the same universal and language specific conventions In addition aspects of the second language have been found to be unevenly acquired and are differentially reflected in particular contexts or settings Yet despite our expanding knowledge this variability is only beginning to be treated in much of the second language acquisition literature This volume presents the work of some researchers and methodologists who have taken on the challenge of including variation in their research designs and pedagogical recommendations Variation is shown to be relevant to linguistic social and psychological aspects of language It is apparent in the registers and dialects of the target language and in the interlanguage of learners     *Psychological Tests*
