

Standard 4 Review Sheet / Key Idea 2

Living Environment

The living things in an area interacting with their physical environment make up an ecosystem.

Organisms which can make their own food by photosynthesis are called autotrophs or producers.

primary consumers are herbivores which eat producers.

secondary consumers are consumers which eat primary consumers.

autotrophs -- organisms able to make its own food (usually using the life process of photosynthesis)

heterotrophs -- is an organism which depends upon other organisms for its food

habitat -- is the place an organism lives

niche -- is the role of an organism in the environment, especially its feeding role.

** No 2 species can occupy the same ecological niche.

As the number of organisms in an ecosystem and their interactions increase, the stability of the ecosystem increases.

Organize the four ecological levels of organization from simplest to most complex.

population (one species) → community (more than one species in an area) → ecosystem (community plus physical factors) → biosphere (all parts of world where life is found)

Life Processes

digestion -- breakdown of food to simpler molecules which can enter the cells

circulation -- the movement of materials within an organism or its cells

movement -- (locomotion) change in position by a living thing

excretion -- removal of waste products by an organism (wastes may include carbon-dioxide, water, and urea in urine and sweat)

Step by Step to College and Career Success John N. Gardner, Betsy O. Barefoot, 2010-12-15 Succeed in college like never before Step By Step To College and Career Success shows you how With the authors signature 12 Steps approach you ll see how small changes can make a big difference Whether you re looking for better grades stronger academic skills or a successful transition to or advancement in the working world STEP Step By Step To College and Career Success is the textbook you need to get there

Measurement - Drill Sheets Vol. 4 Gr. 6-8 Chris Forest, 2015-07-01 This is the chapter slice Drill Sheets Vol 4 Gr 6 8 from the full lesson plan Measurement For grades 6 8 our resource meets the measurement concepts addressed by the NCTM standards and encourages the students to review the concepts in unique ways Each drill sheet contains warm up and timed drill activities for the student to practice measurement concepts The pages of this resource contain a variety in terms of levels of difficulty and content so as to provide students with a variety of differentiated learning opportunities Included are questions involving length volume time money weight and area The drill sheets offer space for reflection and opportunity for the appropriate use of technology Also contained are assessment and standards rubrics review sheets color activity posters and bonus worksheets All of our content meets the Common Core State Standards and are written to Bloom s Taxonomy STEM and NCTM standards

Teaching Undergraduate Science Linda C. Hodges, 2023-07-03 This book is written for all science or engineering faculty who have ever found themselves baffled and frustrated by their undergraduate students lack of engagement and learning The author an experienced scientist faculty member and educational consultant addresses these issues with the knowledge of faculty interests constraints and day to day concerns in mind Drawing from the research on learning she offers faculty new ways to think about the struggles their science students face She then provides a range of evidence based teaching strategies that can make the time faculty spend in the classroom more productive and satisfying Linda Hodges reviews the various learning problems endemic to teaching science explains why they are so common and persistent and presents a digest of key ideas and strategies to address them based on the research she has undertaken into the literature on the cognitive sciences and education Recognizing that faculty have different views about teaching different comfort levels with alternative teaching approaches and are often pressed for time Linda Hodges takes these constraints into account by first offering a framework for thinking purposefully about course design and teaching choices and then providing a range of strategies to address very specific teaching barriers whether it be students motivation engagement in class ability to problem solve their reading comprehension or laboratory research or writing skills Except for the first and last chapters the other chapters in this book stand on their own i e can be read in any order and address a specific challenge students have in learning and doing science Each chapter summarizes the research explaining why students struggle and concludes by offering several teaching options categorized by how easy or difficult they are to implement Some for example can work in a large lecture class without a great expenditure of time others

may require more preparation and a more adventurous approach to teaching Each strategy is accompanied by a table categorizing its likely impact how much time it will take in class or out and how difficult it will be to implement Like scientific research teaching works best when faculty start with a goal in mind plan an approach building on the literature use well tested methodologies and analyze results for future trials Linda Hodges message is that with such intentional thought and a bit of effort faculty can succeed in helping many more students gain exciting new skills and abilities whether those students are potential scientists or physicians or entrepreneurs Her book serves as a mini compendium of current research as well as a protocol manual a readily accessible guide to the literature the best practices known to date and a framework for thinking about teaching

Data Analysis & Probability - Drill Sheets Vol. 4 Gr. PK-2 Tanya Cook and Chris Forest,2015-06-01 This is the chapter slice Drill Sheets Vol 4 Gr PK 2 from the full lesson plan Data Analysis Probability For grades PK 2 our resource meets the data analysis probability concepts addressed by the NCTM standards and encourages the students to review the concepts in unique ways Each drill sheet contains warm up and timed drill activities for the student to practice data analysis probability concepts The pages of this resource contain a variety in terms of levels of difficulty and content so as to provide students with a variety of differentiated learning opportunities Included are questions involving how to collect organize analyze interpret and predict data probabilities The drill sheets offer space for reflection and opportunity for the appropriate use of technology Also contained are assessment and standards rubrics review sheets color activity posters and bonus worksheets All of our content meets the Common Core State Standards and are written to Bloom s Taxonomy STEM and NCTM standards
