Guide to Intelligent Data Analysis Michael R. Berthold,Christian Borgelt,Frank Höppner,Frank Klawonn,2010-06-23 Each passing year bears witness to the development of ever more powerful computers increasingly fast and cheap storage media and even higher bandwidth data connections This makes it easy to believe that we can now at least in principle solve any problem we are faced with so long as we only have enough data Yet this is not the case Although large databases allow us to retrieve many different single pieces of information and to compute simple aggregations general patterns and regularities often go undetected Furthermore it is exactly these patterns regularities and trends that are often most valuable To avoid the danger of drowning in information but starving for knowledge the branch of research known as data analysis has emerged and a considerable number of methods and software tools have been developed However it is not these tools alone but the intelligent application of human intuition in combination with computational power of sound background knowledge with computer aided modeling and of critical reflection with convenient automatic model construction that results in successful intelligent data analysis projects *Guide to Intelligent Data Analysis* provides a hands on instructional approach to many basic data analysis techniques and explains how these are used to solve data analysis problems Topics and features guides the reader through the process of data analysis following the interdependent steps of project understanding data understanding data preparation modeling and deployment and monitoring equips the reader with the necessary information in order to obtain hands on experience of the topics under discussion provides a review of the basics of classical statistics that support and justify many data analysis methods and a glossary of statistical terms includes numerous examples using R and KNIME together with appendices introducing the open source software integrates illustrations and case study style examples to

support pedagogical exposition This practical and systematic textbook reference for graduate and advanced undergraduate students is also essential reading for all professionals who face data analysis problems Moreover it is a book to be used following one's exploration of it Dr Michael R Berthold is Nycomed Professor of Bioinformatics and Information Mining at the University of Konstanz Germany Dr Christian Borgelt is Principal Researcher at the Intelligent Data Analysis and Graphical Models Research Unit of the European Centre for Soft Computing Spain Dr Frank Heppner is Professor of Information Systems at Ostfalia University of Applied Sciences Germany Dr Frank Klawonn is a Professor in the Department of Computer Science and Head of the Data Analysis and Pattern Recognition Laboratory at Ostfalia University of Applied Sciences Germany He is also Head of the Bioinformatics and Statistics group at the Helmholtz Centre for Infection Research Braunschweig Germany

The Starspotter's Guide Sheila Kanani, 2025-09-11 It was a story about space Apollo 13 which first hooked Sheila Kanani and now decades later after achieving a PhD in Saturn's magnetosphere and working as an outreach officer for the Royal Astronomical Society she has made a career of weaving together the science and tales of the stars In *The Starspotter's Guide* her first book for adults Sheila pulls together the rich tapestry of the night sky for the armchair stargazer sharing the stories that cultures across the

world have told about the stars for millennia and how these have shaped our exploration and understanding of the Earth from astrologers in ancient India using the stars to calculate the length of the year to Polynesian explorers using them to navigate far beyond their homes And now as our knowledge expands about the endless expanse above us such as what the stars actually are Sheila takes us on a journey through what you'd see if you could jump on a spacecraft and explore these galaxies yourself In this endlessly informative and persuasively interesting miscellany of the night sky Dr Sheila Kanani takes us on a journey through the cosmos and through the human experience of the stars throughout the ages that will have you rushing outside and looking up searching for the curve of the Milky Way

Multiple Stars across the H-R Diagram Svetlana Hubrig, Monika Petr-Gotzens, Andrei Tokovinin, 2007-10-13 The ESO workshop Multiple Stars across the H-R Diagram was held in Garching on 12-15 July 2005 The topics included observations of multiple stars from ground and space dynamical and stellar evolution in multiple systems effects of the environment on multiplicity formation and early evolution of multiple stars and special components of multiple stars chemically peculiar stars blue stragglers brown dwarfs etc Stars show a marked tendency to be in systems of different multiplicity 7 ranging from simple binaries and triples to globular clusters with $N \geq 10$ Modern observations give a frequency of binary and multiple stars in the Galactic field of up to 70% and between 5% and 20% of these systems are at least triple There is evidence that the degree of multiplicity increases with primary mass Many known multiple systems are too wide to have significant physical interaction between their components However tidal and N -body dynamical interactions are important even in relatively wide systems and probably lead to the shrinkage of inner orbits This sets the stage for spectacular evolutionary processes such as Roche lobe overflow mergers

supernovae formation of special components etc Only recently did we realize that some of these processes require at least three stars The formation of multiple systems remains a difficult and challenging part of astrophysics although it has been addressed at the Workshop only briefly
