The new edition draws on the most recent research and using up to date and topical examples, the book focuses on the development of customer relationships through service, outlining the core concepts and theories in services marketing today. New and updated material in this new edition includes New content related to human resource strategies including coverage of the role of robots and chatbots for delivering customer focused services. New coverage on listening to customers through research, big data, netnography and monitoring user generated content. Increased technology, social media and digital coverage throughout the text including the delivery of services using mobile and digital platforms as well as through the Internet of Things. Brand new examples and case studies added from global and innovative companies including Turkish Airlines, Volvo, EasyJet and McDonalds. Strategic Corporate Social Responsibility David Chandler, 2022-09-12 *Strategic Corporate Social Responsibility: Sustainable Value Creation* Sixth Edition redefines corporate social responsibility (CSR) as being central to the value creating purpose of the firm. Based on a theory of empowered stakeholders, this bestselling text argues that the responsibility of a corporation is to create value broadly defined. The primary challenge for managers today is to balance the competing interests of the firm's stakeholders, understanding that what they expect today may not be what they will expect tomorrow. This tension is what makes CSR so complex and demanding, but it is also what makes CSR integral to the firm's strategy and day to day operations. In this new Sixth Edition, author David Chandler explores issues around COVID 19, the BLM movement, the supply chain crunch and the great resignation.

People are increasingly seen as an important differentiator to companies that are seeking Globalization and Innovation. However, many companies find themselves without Engagement with employees. Japanese companies have a unique engagement model with employees which enable people working as the organization.
