State Cardiovascular Disease Report:

Cardiovascular Diseases in the United States Iwao Milton Moriyama, Dean E. Krueger, Jeremiah Stamler, 1971
Cardiovascular diseases kill and disable more than a million Americans each year The major types of this complex of diseases are coronary heart disease hypertensive disease cerebrovascular diseases rheumatic heart disease and congenital malformations of the circulatory system Authors Moriyama Krueger and Stamler relate each of these types to etiology age of patient at onset clinical course and socioeconomic impact on the population For each type of cardiovascular disease they analyze the quantitative data on the incidence prevalence and levels and time trends of mortality and on the demographic characteristics of person affected They also examine international differences in levels and trends in mortality and point out areas for further research More than thirty five figures as well as extensive tables document their text Report to the President: A National Program to Conquer Heart Disease, Cancer and Stroke United States. Christensen, 1952 **Fat in the Fifties** Nicolas Rasmussen, 2019-03-26
A riveting history of the rise and fall of the obesity epidemic during 1950s and 1960s America Metropolitan Life Insurance Company identified obesity as the leading cause of premature death in the United States in the 1930s but it wasn't until 1951 that the public health and medical communities finally recognized it as America's Number One Health Problem The reason for MetLife's interest They wanted their policyholders to live longer and continue paying their premiums Early postwar America responded to the obesity emergency but by the end of the 1960s the crisis waned and official rates of true obesity were reduced despite the fact that Americans were growing no thinner What mid century factors and forces established obesity as a politically meaningful and culturally resonant problem in the first place And why did obesity fade from public and

medical consciousness only a decade later Based on archival records of health leaders as well as medical and popular literature *Fat in the Fifties* is the first book to reconstruct the prewar origins emergence and surprising disappearance of obesity as a major public health problem Author Nicolas Rasmussen explores the postwar shifts that drew attention to obesity as well as the varied approaches to its treatment from thyroid hormones to psychoanalysis and weight loss groups Rasmussen argues that the US government was driven by the new Cold War and the fear of atomic annihilation to heightened anxieties about national fitness Informed by the latest psychiatric thinking which diagnosed obesity as the result of oral fixation just like alcoholism health professionals promoted a form of weight loss group therapy modeled on Alcoholics Anonymous The intervention caught on like wildfire in 1950s suburbia But the sense of crisis passed quickly partly due to cultural changes associated with the later 1960s and partly due to scientific research some of it sponsored by the sugar industry emphasizing particular dietary fats rather than calorie intake Through this riveting history of the rise and fall of the obesity epidemic readers gain an understanding of how the American public health system ambitious strong and second to none at the end of the Second World War was constrained a decade later to focus mainly on nagging individuals to change their lifestyle choices *Fat in the Fifties* is required reading for public health practitioners and researchers physicians historians of medicine and anyone concerned about weight and weight loss *Index-catalogue of the Library of the Surgeon-General's Office, United States Army* National Library of Medicine (U.S.),1942 **Index-catalogue of the Library of the Surgeon General's Office, United States Army (Armed Forces Medical Library).** Armed Forces Medical Library (U.S.),National Library of Medicine (U.S.),Library of the Surgeon-General's Office (U.S.),1955 Collection of incunabula and early medical prints in the library of the Surgeon general s office U S Army Ser 3 v 10 p 1415 1436 **Index-catalogue of the Library of the Surgeon General's Office, United States Army (Army Medical Library).** Authors and Subjects Army Medical Library (U.S.),1955 Prevention of Leading Work-related Diseases and Injuries ,1987
