dollars that are invested in biodiversity conservation annually What can be done to rectify this situation This book tackles many aspects of the problem of biodiversity monitoring It arose from a major workshop held at The Australian National University in February 2011 attended by leaders in the science policy making and management arenas of biodiversity conservation Chapter contributors examine what has led to successful monitoring the key problems with biodiversity monitoring and practical solutions to those problems By capturing critical insights into successes failures and solutions the authors provide high level guidance for important initiatives such as the National Biodiversity Strategy Ultimately the authors hope to considerably improve the quality and effectiveness of biodiversity monitoring in Australia and to arrest the decline of biodiversity KEY FEATURES Engaging style Practical information that is based on very high quality scientific information *Urban Sustainability Transitions* Trivess Moore,Fjalar de Haan,Ralph Horne,Brendan James

Gleeson,2017-10-27 This book contributes to current debates regarding purposive transitions to sustainable cities providing an accessible but critical exploration of sustainability transitions in urban settings We have now entered the urban century which is not without its own challenges as discussed in the preceding book of this series Urbanization is accompanied by a myriad of complex and overlapping environmental social and governance challenges which increasingly call into question conventional market based responses and simple top down government interventions Faced with these challenges urban practitioners and scholars alike are interested in promoting purposive transitions to sustainable cities The chapters in this volume contribute to the growing body of literature on city scale transformative change which seeks to address a lack of consideration for spatial and urban governance dimensions in sustainability transitions studies and expand on the basis established in the preceding book Drawing on a range of perspectives and written by leading Australian and international urban researchers the chapters explore contemporary cases from Australia and locate them within the international context Australia is on the one hand representative of many OECD countries while on the other possessing a number of unique attributes that may serve to highlight issues and potentials internationally Australia is a highly urbanized country and because of the federal political structure and the large distances the five largest state capital cities have a relatively high degree of autonomy in governance even dominating the rest of their respective states and rural hinterlands to a certain extent This context suggests that Australian cases can provide interesting test tube perspectives on processes relevant to urban sustainability transitions worldwide This volume presents an extensive overview of theories concepts approaches and practical examples informed by sustainability transitions thinking offering a unique resource for all urban practitioners and scholars who want to understand and transition to sustainable urban futures World Ocean Assessment Alan

Simcock,2017-04-17 This United Nations report examines the current state of knowledge of the world s oceans for policymakers and provides a reference for marine science courses *Urban Water Reuse Handbook* Saeid

Eslamian,2016-01-05 Examining the current literature research and relevant case studies presented by a team of

international experts the Urban Water Reuse Handbook discusses the pros and cons of water reuse and explores new and alternative methods for obtaining a sustainable water supply The book defines water reuse guidelines describes the historical and current

Conflict and Change in Australia's Peri-Urban Landscapes Melissa Kennedy, Andrew Butt, Marco Amati, 2016-03-22 In an era of rapid urbanization peri urban areas are emerging as the fastest growing regions in many countries Generally considered as the space extending one hundred kilometres from the city fringe peri urban areas are contested and subject to a wide range of uses such as residential development productive farming water catchments forestry mineral and stone extraction and tourism and recreation Whilst the peri urban space is valued for offering a unique ambiance and lifestyle it is often highly vulnerable to bushfire and loss of biodiversity and vegetation along with threats to farming and food security in highly productive areas Drawing together leading researchers and practitioners this volume provides an interdisciplinary contribution to our knowledge and understanding of how peri urban areas are being shaped in Australia through a focus on four overarching themes Peri urban Conceptualizations Governance and Planning Land Use and Food Production and Solutions and Representations Whilst the case studies focus on Australia they advance a variety of tools useful in discerning processes and impacts of peri urban change globally Furthermore the findings are instructive of the issues and tensions commonly encountered in rapidly urbanizing peri urban areas throughout the world from landscape valuation and biosecurity concerns to functional adaptation and social change

Australia's Biodiversity and Climate Change Will Steffen, Andrew A. Burbidge, Lesley Hughes, Roger Kitching, David Lindenmayer, Warren Musgrave, Mark Stafford Smith, Patricia A. Werner, 2009 Australia's unique biodiversity is under threat from a rapidly changing climate The effects of climate change are already discernible at all levels of biodiversity genes species communities and ecosystems Many of Australia's most valued and iconic natural areas the Great Barrier Reef south western Australia the Kakadu wetlands and the Australian Alps are among the most vulnerable But much more is at stake than saving iconic species or ecosystems Australia's biodiversity is fundamental to the country's national identity economy and quality of life In the face of uncertainty about specific climate scenarios ecological and management principles provide a sound basis for maximising opportunities for species to adapt communities to reorganise and ecosystems to transform while maintaining basic functions critical to human society This innovative approach to biodiversity conservation under a changing climate leads to new challenges for management policy development and institutional design This book explores these challenges building on a detailed analysis of the interactions between a changing climate and Australia's rich but threatened biodiversity Australia's Biodiversity and Climate Change is an important reference for policy makers researchers educators students journalists environmental and conservation NGOs NRM managers and private landholders with an interest in biodiversity conservation in a rapidly changing world Publisher

Urban Infrastructure K. Wellman, Marcus Spiller, 2012-07-30 The magnitude of investment the long time frames involved and the influence of pre existing infrastructure on urban infrastructure provision make a co

ordinated approach to forward planning policy development and implementation essential There are major challenges in making decisions on urban infrastructure and getting management structures and processes in place Getting it right generates long term dividends getting it wrong involves major costs often borne by taxpayers Urban Infrastructure finance and management is posited on a strong belief that the physical structure of cities and the efficiency of infrastructure services delivered are driven by efficiencies within individual infrastructure sectors lessons learnt across these sectors and the ability to co ordinate and integrate sectors to generate economies of scale This necessitates an interdisciplinary approach integrating knowledge from finance governance planning and management as well as the characteristics of the individual urban infrastructure sectors involved Here it is not only about getting the initial decisions and policy settings right but also ensuring effective implementation A major theme running through the book is the nature of institutions and the governance structures responsible for delivery and management of urban infrastructure and the decision making processes involved The editors have taken a deliberately pragmatic approach to the finance and management of urban infrastructure chapters are cross sectorial and present both theory and practice This book is for students and practitioners in policy planning urban management infrastructure finance and management

Criminological and Legal Consequences of Climate Change Stephen Farrall,Tawhida Ahmed,Duncan French,2012-04-02 This edited collection the result of an international seminar held at the International Institute for the Sociology of Law O ati Spain in 2010 explores the potential legal and criminological consequences of climate change both domestically and for the international community A novel feature of the book is the consideration given to the potential synergies between the two disciplinary foci thus to encourage among legal scholars and criminologists not only an analysis of the consequences of climate change from these perspectives but to bring these fields together to provide a unique inter disciplinary exploration of the ways in which climate change does or could impact on our societies Such an inter disciplinary approach is necessary given that climate change is a multifaceted phenomenon and one which is intimately linked across disciplines To study this topic from the point of view of a single social science discipline restricts our understanding of the societal consequences of climate change It is hoped that this edited collection will identify emerging areas of concern illuminate areas for further research and most of all encourage future academic discussion on this most critical of issues

Water Resources Management in the People's Republic of China

Xuetao Sun,Robert Speed,Dajun Shen,2013-09-13 Chinese water resource managers face a challenge that is both immense and unique They must balance limited water supplies against the needs of the world s largest population demands for rapid economic growth with calls for improved environmental management and the desire for a market based approach to the

allocation of water with a history of State ownership and strict government control of all resources In China changes are occurring in water resources management that are representative of many of the fundamental changes occurring within Chinese society on issues such as property rights community participation improved environmental management and the shift towards market based decision making This book describes the development of a water rights system in the People's Republic of China It covers different aspects of water resources management in China including water planning the provision of environmental flows urban water management and irrigation district management and examines how these are being addressed through a rights based approach The book includes several detailed examples of the Chinese application of water rights as they address the diverse challenges of different basins across China This book previously appeared as a special issue of the International Journal of Water Resources Development

Sustainable Coastal Management and Climate

Adaptation Richard Kenchington, David Wood, Laura Stocker, 2012-09-06 Australians are famous for our love of the coast although in many places this love has caused serious and often irreversible impacts The sustainable management of our society's many uses of the coast is complex and challenging While a wealth of knowledge exists about the coast this is not always brought to bear on decision making Coastal management to date has had limited success and in some cases interventions have made problems worse Australia's coast has been shaped by severe events such as cyclones and floods with climate change now increasing the number and intensity of these hazards In addition our coastal populations are growing and with them our social environmental and economic vulnerability to such hazards This book explores the evolution of coastal management and provides critical insights into contemporary experience and understanding of coastal management in Australia It draws on contemporary theory and lessons from case examples to highlight the roles of research and community engagement in coastal management The book concludes with a chapter of recommendations which can help guide coastal management and research around the world

Demographic Change in Australia's Rural Landscapes Gary W. Luck, Digby Race, Rosemary Black, 2010-11-30 The distribution and re distribution of people across the landscape has significant implications for ecological economic and social dynamics Movement of people to urban centres mostly from rural landscapes especially in the developing world is a major global phenomenon This can result in the depopulation of rural landscapes Conversely population growth and a changing demographic profile have been identified for particular rural landscapes with notable examples from North America Europe and Australia Yet we know little of the factors that drive demographic changes in rural landscapes and even less about the implications of these changes This book examines broad and local scale patterns of demographic change in rural landscapes identifies some of the drivers of these changes using Australian case studies or comparisons between Australian and international contexts and outlines the implications of changes for society and the environment This book makes a valuable

contribution to the literature because it adopts an integrated and interdisciplinary approach by explicitly linking demographic change with environmental land use social and economic factors This integrated approach was achieved by encouraging interaction among authors writing on similar topics to ensure coherency and complementarity among chapters and cross pollination of ideas and perspectives Chapters are presented as interactive and reflective discussions that address the findings of other contributors yet each chapter contains enough background to stand alone as a unique contribution
