Teaching Mathematics Roza Leikin,Rina Zazkis,2010-04-10 The idea of teachers Learning through Teaching LTT when  
presented to a na ve bystander appears as an oxymoron Are we not supposed to learn before we teach After all under the  
usual circumstances learning is the task for those who are being taught not of those who teach However this book is about  
the learning of teachers not the learning of students It is an ancient wisdom that the best way to truly learn something is to  
teach it to others Nevertheless once a teacher has taught a particular topic or concept and consequently truly learned it what  
is left for this teacher to learn As evident in this book the experience of teaching presents teachers with an exciting opp  
tunity for learning throughout their entire career This means acquiring a better understanding of what is being taught and  
moreover learning a variety of new things What these new things may be and how they are learned is addressed in the  
collection of chapters in this volume LTT is acknowledged by multiple researchers and mathematics educators In the rst  
chapter Leikin and Zazkis review literature that recognizes this phenomenon and stress that only a small number of studies  
attend systematically to LTT p cesses The authors in this volume purposefully analyze the teaching of mathematics as a  
source for teachers own learning      *Catalogue of Title-entries of Books and Other Articles Entered in the Office of the*
