a more just way while also building on the existing technologies and our knowledge of the present The Left Hand of Data explores the many ways in which we use data to shape the possible futures of young people in schools in informal learning environments in colleges in libraries and with educational games It considers the processes by which students are sorted labeled categorized and intervened upon using the bevy of data extracted and collected from individuals and groups anonymously or identifiably When how and with what biases are these data collected and utilized What decisions must educational researchers make around data in an era of high stakes assessment surveillance and rising inequities tied to race class gender and other intersectional factors How are these complex considerations around data changing in the rapidly evolving world of machine learning AI and emerging fields of educational data science The surprising answers the authors discover in their research make clear that we do not need to wait for a hazy tomorrow to do better today **AP**
