

DRONE

The unassuming large drone serves two critically important roles for the Swarm. Originally, very evolution accumulated DNA from the genetic waste of Eldarons to create an efficient, durable worker for the job of gathering resources for the colony. But much like the large larvae, the drone had evolved that were so close and adaptable that the drone became the genetic stem—the biological starting point—for all very colony structures.

A drone can actually serve the Swarm's insatiable compulsion to expand by sacrificing its own body to the mutation of new colony organs—what we call "buildings." Genes that originate of a remarkably strong and resilient bonding substance (labeled "B-5001" by human scientists) forms the structural bulk of all drone mutations. The drone's finely webbed scutellum membrane creates a malleable template that frames each structure as it quickly mutates into final form.

Care in the Past Lindsay Powell,William Southwell-Wright,Rebecca Gowland,2016-11-30 Care giving is an activity that has been practiced by all human societies From the earliest societies through to the present all humans have faced choices regarding how people in positions of dependency are to be treated As such care giving and the form it takes is a central experience of being a human and one that is culturally mediated Archaeology has tended to marginalise the study of care and debates surrounding our ability to recognise it within the archaeological record have often remained implicit rather than a focus of discussion These 12 papers examine the topic of care in past societies and specifically how we might recognise the

provision of care in archaeological contexts and to open up an inter disciplinary conversation including historical bioarchaeological faunal and philosophical perspectives The topic of care is examined through three different strands the provision of care throughout the life course namely that provided to the youngest and oldest members of a society care giving and attitudes towards impairment and disability in prehistoric and historic contexts and the role of animals as both recipients of care and as tools for its provision The New Cambridge Bibliography of English Literature George Watson,Ian Roy Willison,1974 **Calamity** Andy T.
