A1 States of Matter

No.	Answers	Further explanations
1	C	
2	D	$\text{NH}_3(\text{g}) + \text{HCl}(\text{g}) \longrightarrow \text{NH}_4\text{Cl}(\text{s})$ <p>The concentrated ammonia solution gives off ammonia gas and the concentrated hydrochloric acid gives off hydrogen chloride gas, shown by the state symbols (g). The particles of both gases diffuse along the tube, collide and react to form a white ring composed of solid white ammonium chloride particles, shown by the state symbol (s).</p>
3	A	<p>Ammonia molecules diffuse faster than hydrogen chloride molecules. Ammonia molecules are smaller and lighter than hydrogen chloride molecules, so they diffuse faster along the tube, and the particles of the two gases collide and react closer to the source of the hydrogen chloride.</p>
4	C	
5	A	<p>Increased in length and become rigid</p> <p>The paw-paw strip is composed of living cells. Each cell is surrounded by a differentially permeable membrane and contains cytoplasm containing about 80% water. By osmosis, water enters each cell causing it to swell slightly. This causes the strip to increase in length and become rigid.</p>
6	B	<p>Moved down</p> <p>The 20% sucrose solution inside the thistle funnel contains more water than the 40% sucrose solution in the beaker. By osmosis, water moves out of the solution in the thistle funnel through the differentially permeable membrane into the solution in the beaker. This decreases the volume of the solution in the thistle funnel which causes the meniscus to move down.</p>

Narrative Life Neil Hooley, 2009-04-29 Indigenous education is one of the great challenges facing humanity in the historic quest for a democratic and peaceful future The 370 million Indigenous peoples of the world demand that the racist and colonial wrongs of the past be rectified and that they stand as equals in confronting the social political and cultural problems that surround us all Education offers a way forward whether concerned with the public good schooling for all citizens including universal primary education and expanding secondary education the education of women regardless of background the inclusion of local cultures literacy and numeracy for all as a democratic right and the provision of comprehensive education that enables both personal aspiration cultural satisfaction and economic pathways What this means is that all children no matter where they live no matter what

their background or the colour of their skin should expect to have access to education of the highest quality This does not impose a particular style of education for local communities but respects that educational directions must be decided independently by countries themselves Within this general context there is also something most profound about Indigenous knowing of appreciating Indigenous perspectives and applying these across all knowledge across all subjects of a curriculum Rather than accepting the one often highly conservative and dominant view of knowledge teaching and learning for all schools Indigenous perspectives offer other insights and means of analysis reflection and critique These can open up fields of creative and critical learning for all children including the dispossessed marginalised and disenfranchised
