Pigmentocracies Edward Telles,2014-10-22 Pigmentocracies the fruit of the multiyear Project on Ethnicity and Race in Latin America PERLA is a richly revealing analysis of contemporary attitudes toward ethnicity and race in Brazil Colombia Mexico and Peru four of Latin America s most populous nations Based on extensive original sociological and anthropological data generated by PERLA this landmark study analyzes ethnoracial classification inequality and discrimination as well as public opinion about Afro descended and indigenous social movements and policies that foster greater social inclusiveness all set within an ethnoracial history of each country A once in a generation examination of contemporary ethnicity this book promises to contribute in significant ways to policymaking and public opinion in Latin America Edward Telles PERLA s principal investigator explains that profound historical and political forces including multiculturalism have helped to shape the formation of ethnic identities and the nature of social relations within and across nations One of Pigmentocracies s many important conclusions is that unequal social and economic status is at least as much a function of skin color as of ethnoracial identification Investigators also found high rates of discrimination by color and ethnicity widely reported by both targets and witnesses Still substantial support across countries was found for multicultural affirmative policies a notable result given that in much of modern Latin America race and ethnicity have been downplayed or ignored as key factors despite their importance for earlier nation building Manual of Simulation in Healthcare Richard H. Riley,2008 Medical simulation is a relatively new science that is achieving respectability among healthcare educators worldwide Simulation and skills centres have become established to integrate simulation into mainstream education in all medical nursing and paramedical fields Borrowing from the experience and methodologies of industries that are using simulation medical educators are grappling with the problem of rapidly acquiring the skills and techniques required to implement simulation programmes into

established curricula This book assists both novice and experienced workers in the field to learn from established practitioners in medical simulation Simulation has been used to enhance the educational experience in a diverse range of fields therefore a wide variety of disciplines are represented The book begins with a section on the logistics of establishing a simulation and skills centre and the inherent problems with funding equipment staffing and course development and promotion Section two deals with simulators and related training devices that are required to equip a stand alone or institution based centre The features strengths and weaknesses of training devices are presented to help the reader find the appropriate simulator to fulfil their training requirements There is a guide to producing scenarios and medical props that can enhance the training experience The third section covers adult education and it reviews the steps required to develop courses that comply with best practice in medical education Teaching skills facilitating problem based learning groups and debriefing techniques are especially important to multidisciplinary skills centres that find themselves becoming a centre for medical education The manual concludes with guides for the major specialties that use simulation including military paediatrics CPR and medical response teams obstetrics and anaesthesia

Research in Education, 1972 Giving Preservation a History Randall F. Mason, Max Page, 2019-10-21 In this volume some of the leading figures in the field have been brought together to write on the roots of the historic preservation movement in the United States ranging from New York to Santa Fe Charleston to Chicago Giving Preservation a History explores the long history of historic preservation how preservation movements have taken a leading role in shaping American urban space and development how historic preservation battles have reflected broader social forces and what the changing nature of historic preservation means for efforts to preserve national urban and local heritage The second edition adds several new essays addressing key developing areas in the field by major new voices The new essays represent the broadening range of scholarship on historic preservation generated since the publication of the first edition taking better account of the role of cultural diversity and difference within the field while exploring the connections between preservation and allied concerns such as environmental sustainability LGBTQ and nonwhite identity and economic development
