their functions both to reveal the closural specificities of the ludonarrative hybrid that digital games are as well as to find the core elements that characterise endings in any medium It examines how endings make themselves known to players and raises the question of how well established closural conventions blend with play and a player's effort to achieve a goal As an interdisciplinary study that draws on game studies as much as on transmedial narratology *Forms and Functions of Endings in Narrative Digital Games* is suited for scholars and students of digital games as well as for narratologists yet to become familiar with this medium **From Grain to Pixel** Giovanna Fossati, 2025-10-01 In *From Grain to Pixel* Giovanna Fossati analyzes the transition from analog to digital film and its profound effects on filmmaking and film archiving Reflecting on the theoretical conceptualization of the medium itself Fossati poses significant questions about the status of physical film and the practice of its archival preservation restoration and presentation *From Grain to Pixel* attempts to bridge the fields of film archiving and academic research by addressing the discourse on film's ontology and analyzing how different interpretations of what film is affect the role and practices of film archives By proposing a novel theorization of film archival practice Fossati aims to stimulate a renewed dialogue between film scholars and film archivists Almost a decade after its first publication this revised edition covers the latest developments in the field Besides a new general introduction a new conclusion and extensive updates to each chapter a novel theoretical framework and an additional case study have been included *The Business and Culture of Digital Games* Aphra Kerr, 2006-04-06 This book explores the lifecycle of digital games Drawing upon a broad range of media studies perspectives with aspects of sociology social theory and economics Aphra Kerr explores this all pervasive but under theorized aspect of our media environment *Affective and Emotional Aspects of Human-computer Interaction* Maja Pivec, 2006 The learning process can be seen as an emotional and personal experience that is addictive and motivates learners to proactive behavior Divided in three parts this title discusses major topics such as emotions motivation games and game experience *Digital Diaspora* Anna Everett, 2009-02-05 2009 CHOICE Outstanding Academic Title Deftly interweaving history culture and critical theory Anna Everett traces the rise of black participation in cyberspace particularly during the early years of the Internet She challenges the problematic historical view of black people as quintessential information age outsiders or poster children for the digital divide by uncovering their early technolust and repositioning them as eager technology adopters and consumers and thus as coconstituent elements in the information technology revolution She offers several case studies that include lessons learned from early adoption of the Internet by the Association of Nigerians Living Abroad and their Nijanet virtual community the grassroots organizing efforts that led to the phenomenally successful Million Woman March the migration of several historic black presses online and an interventionist critique of race in contemporary video games Ultimately *Digital Diaspora* shows how African Americans and African diasporic peoples developed the necessary technomastery to ride in the front of the bus on the information superhighway
