The Jungle Annotated:

The Jungle (Annotated) Upton Sinclair, 2021-03-03 The Jungle is widely held to be Upton Sinclair's magnum opus a particularly significant accolade for a novel authored by a man with a 90 strong collection of plays novels and essays to his name The book was published in 1906 when Sinclair was just 28 years old and is a factual portrayal of the lives of America's immigrants Sinclair did not hold back in portraying the harsh realities of the working conditions poverty and hardships of the poor revealing details previously unknown to much of the public Its cultural impact was subsequently momentous and the book is to this day often used in the academic realm to educate people about the corrupt nature of the industry The book is largely centered on and around immigrants working in a meatpacking factory and serves not just as a heart rending reveal of the mistreatment and impoverishment of a group of people but also as a brave and iconic expose of the meatpacking industry What Sinclair achieved with The Jungle was nothing short of groundbreaking and far beyond anything he could possibly have hoped for or dreamed of and it is no surprise that his words and the shocking truths portrayed through them went on to greatly influence and indeed initiate significant change in both a social and political context Speaking of the book in 1906 the year in which it was first officially published Sinclair told how he had aimed at the public's heart and by accident hit it in the stomach

The Annotated Malay Archipelago by Alfred Russel Wallace Alfred Russel Wallace, 2014-09-29 Wallace's Malay Archipelago is a classic account of the travels of a Victorian naturalist through island Southeast Asia It has been loved by readers ever since its publication in 1869 Despite numerous modern reprints with appreciative introductions this is the first and long overdue annotated edition in English This edition explains updates and corrects the original text with an historical introduction and hundreds of explanatory notes Wallace left hundreds of people places publications and species unidentified He referred to most species only with the scientific name current at the time Whenever available the common names for species have been provided and scientific names updated The content of the book has never been thoroughly analysed and compared against other contemporary sources It turns out that the book contains many errors This includes not just incorrect dates and place names but some of the most remarkable anecdotes for example the dramatic claim that tigers kill on an average a Chinaman every day in Singapore or that a Dutch Governor General committed suicide by leaping from a waterfall on Celebes By correcting the text of the Malay Archipelago against Wallace's letters and notebooks and other contemporary sources and by enriching it with modern identifications this edition reveals Wallace's work as never before
