Acoustic Waves Don Dissanayake, 2010-09-28 SAW devices are widely used in multitude of device concepts mainly in MEMS and communication electronics As such SAW based micro sensors actuators and communication electronic devices are well known applications of SAW technology For example SAW based passive micro sensors are capable of measuring physical properties such as temperature pressure variation in chemical properties and SAW based communication devices perform a range of signal processing functions such as delay lines filters resonators pulse compressors and convolvers In recent decades SAW based low powered actuators and

microfluidic devices have significantly added a new dimension to SAW technology. This book consists of 20 exciting chapters composed by researchers and engineers active in the field of SAW technology, biomedical and other related engineering disciplines. The topics range from basic SAW theory, materials and phenomena to advanced applications such as sensors, actuators and communication systems. As such, in addition to theoretical analysis and numerical modelling such as Finite Element Modelling (FEM) and Finite Difference Methods (FDM) of SAW devices, SAW based actuators and micro motors and SAW based micro sensors are some of the exciting applications presented in this book. This collection of up to date information and research outcomes on SAW technology will be of great interest not only to all those working in SAW based technology but also to many more who stand to benefit from an insight into the rich opportunities that this technology has to offer, especially to develop advanced low powered biomedical implants and passive communication devices.

RF Modelling and Characterization of Tyre Pressure Sensors and Vehicle Access Systems Brzeska, Malgorzata Dominika, 2015-05-12. Core topics of the work are the vehicle access systems such as Passive Start and Entry (PASE), Remote Keyless Entry (RKE) as well as Tyre Pressure Monitoring System (TPMS). Two goals are followed: the development of antennas and functionality analysis from RF (Radio Frequency) point of view and improvement of system parts. The overall objective of this work is to advance the state of the art vehicular electromagnetic simulation taking into account the vehicle body and nearest surroundings.
