A Course in Mathematical and Statistical Ecology Anil Gore, S.A. Paranjpe, 2013-04-17 As the world enters the new millennium mankind faces a series of new problems many of them created by man himself These include overpopulation air and water pollution global warming accumulation of greenhouse gases damage to the ozone layer and loss of biodiversity Perhaps these problems were around even earlier in an incipient stage but they have now assumed global proportions and are uppermost in the minds of all A natural consequence is enhanced interest in sciences connected with these problems Ecology is a field that is immensely useful in understanding many of them In the seventies nature conservation became a concern of wide sections of society well beyond the small group of expert ecologists Species extinction and depletion of biological resources were seen as major threats to human welfare It was therefore natural for scientists from different disciplines to seek reasons behind these developments We were no exceptions and when opportunity to interact with ecologists as statistical consultants came we found ourselves reading more and more of ecology and evolutionary biology Several years ago we proposed starting of an elective one semester course on statistical ecology for graduate students of statistics of Pune University
