Applications of Finite Element Modeling for Mechanical and Mechatronic Systems Marek Krawczuk, Magdalena Palacz, 2021-09-02 Modern

engineering practice requires advanced numerical modeling because among other things it reduces the costs associated with prototyping or predicting the occurrence of potentially dangerous situations during operation in certain defined conditions. Thus far different methods have been used to implement the real structure into the numerical version. The most popular uses have been variations of the finite element method (FEM). The aim of this Special Issue has been to familiarize the reader with the latest applications of the FEM for the modeling and analysis of diverse mechanical problems. Authors are encouraged to provide a concise description of the specific application or a potential application of the Special Issue.
