design process *Electric and Plug-in Hybrid Vehicle Networks* Emanuele Crisostomi, Robert Shorten, Sonja Stüdli, Fabian Wirth, 2017-10-30 This book explores the behavior of networks of electric and hybrid vehicles The topics that are covered include energy management issues for aggregates of plug in vehicles the design of sharing systems to support electro mobility context awareness in the operation of electric and hybrid vehicles and the role that this plays in a Smart City context and tools to test and design massively large scale networks of such vehicles The book also introduces new and interesting control problems that are becoming prevalent in the EV PHEV s context as well as identifying some open questions A particular focus of the book is on the opportunities afforded by networked actuation possibilities in electric and hybrid vehicles and the role that such actuation may play in air quality and emissions management **Semantic Technology**

Guilin Qi, Kouji Kozaki, Jeff Z. Pan, Siwei Yu, 2016-03-19 This book constitutes the thoroughly refereed proceedings of the 5th Joint International Semantic Technology Conference JIST 2015 held in Yichang China in November 2015 The theme of the JIST 2015 conference was Big Data and Social Media The JIST 2015 conference consisted of main technical tracks including 2 keynotes 2 invited talks a regular technical paper track full and short papers an in use track a poster and demo session workshop and tutorial The 14 full and 8 short papers in this volume were carefully reviewed and selected from 43 submissions The paper cover the following topics ontology and reasoning linked data learning and discovery RDF and query knowledge graph knowledge integration query and recommendation and applications of semantic technologies *The Hacked World Order* Adam Segal, 2016-02-23 For more than three hundred years the world wrestled with conflicts that arose between nation states Nation states wielded military force financial pressure and diplomatic persuasion to create world order Even after the end of the Cold War the elements comprising world order remained essentially unchanged But 2012 marked a transformation in geopolitics and the tactics of both the established powers and smaller entities looking to challenge the international community That year the US government revealed its involvement in Operation Olympic Games a mission aimed at disrupting the Iranian nuclear program through cyberattacks Russia and China conducted massive cyber espionage operations and the world split over the governance of the Internet Cyberspace became a battlefield Cyber conflict is hard to track often delivered by proxies and has outcomes that are hard to gauge It demands that the rules of engagement be completely reworked and all the old niceties of diplomacy be recast Many of the critical resources of statecraft are now in the hands of the private sector giant technology companies in particular In this new world order cybersecurity expert Adam Segal reveals power has been well and truly hacked Solar Powered Charging Infrastructure for Electric Vehicles Larry E. Erickson, Jessica Robinson, Gary Brase, Jackson Cutsor, 2016-10-14 The Paris Agreement on Climate Change adopted on December 12 2015 is a voluntary effort to reduce greenhouse gas emissions In order to reach the goals of this agreement there is a need to generate electricity without greenhouse gas emissions and to electrify transportation An infrastructure of SPCSs can help accomplish both of these transitions Globally expenditures associated with the generation transmission and

use of electricity are more than one trillion dollars per year Annual transportation expenditures are also more than one trillion dollars per year Almost everyone will be impacted by these changes in transportation solar power generation and smart grid developments The benefits of reducing greenhouse gas emissions will differ with location but all will be impacted This book is about the benefits associated with adding solar panels to parking lots to generate electricity reduce greenhouse gas emissions and provide shade and shelter from rain and snow The electricity can flow into the power grid or be used to charge electric vehicles EVs Solar powered charging stations SPCSs are already in many parking lots in many countries of the world The prices of solar panels have decreased recently and about 30% of the new U S electrical generating capacity in 2015 was from solar energy More than one million EVs are in service in 2016 and there are significant benefits associated with a convenient charging infrastructure of SPCSs to support transportation with electric vehicles Solar Powered Charging Infrastructure for Electric Vehicles A Sustainable Development aims to share information on pathways from our present situation to a world with a more sustainable transportation system with EVs SPCSs a modernized smart power grid with energy storage reduced greenhouse gas emissions and better urban air quality Covering 200 million parking spaces with solar panels can generate about 1 4 of the electricity that was generated in 2014 in the United States Millions of EVs with 20 to 50 kWh of battery storage can help with the transition to wind and solar power generation through owners responding to time of use prices Written for all audiences high school and college teachers and students those in industry and government and those involved in community issues will benefit by learning more about the topics addressed in the book Those working with electrical power and transportation who will be in the middle of the transition will want to learn about all of the challenges and developments that are addressed here
