They simply don't know what they don't know. They have spent 12 years being educated but will soon find out that they do not have all the tools needed to succeed in life. When they purchase their first car they will not use Algebra but they will need to understand the Time Value of Money equation to calculate the payments. Who teaches them that in school? The average American has around \$8,500 in outstanding credit card debt. The 2007-2008 subprime mortgage crisis demonstrated how much more we all need to learn about home mortgages and our personal finances. This is why this book is so important. The Real Life 101 Handbook is a beginner's guide to the world of personal finance. It explains everything from how a checking account works to how to purchase your first home. It is for anyone and everyone who wants to learn how to make the best personal financial decisions in order to get the most out of the money they earn. The book does not have any secret formula for how you can quickly become rich; however, it gives you the information you need to develop your own plans to become financially secure. I hope you enjoy it.

The Arrival of the Electric Car CHRIS JOHNSTON, ED SOBEY, 2022-12-29. Second Edition. Are you considering buying an electric vehicle? All of us are witnessing a once-in-a-lifetime transformation. For over one hundred years, gasoline and diesel fuels have powered ground transportation throughout the world. Now that is changing, and 2023 is the year when most people will recognize that change is happening. This book is a comprehensive, easy-to-understand overview of the passenger EV universe, including guides for buying and owning an electric car. The authors discuss choosing, owning, and driving an electric car, then explain the features, advantages, benefits, and limitations of over 45 EV models, including pickup trucks, SUVs, and sedans. If you have to have a car, make it an electric car. As this book makes clear, they are better than old-fashioned vehicles in every way.

Bill McKibben, American environmentalist and climate change authority, co-founded 350.org and spearheaded the fossil fuel divestment campaign, resulting in endowments worth more than \$15 trillion stepping back from oil, gas, and coal. Thankfully,

now that the electric vehicle R D dark ages are coming to an end and automakers around the world are charging up their EV programs there s no doubt that we re about to see massive valuable change in our transportation landscape Sebastian Blanco one of America s leading electric car journalists who has been writing about EVs since 2006
