Loader, 2018-12-07 Digital transformation is a business concern it is no longer just IT that must get things done The disruptive force of start ups focusing on IT based services that can be consumed through mobile devices cannot be underestimated These start ups eat away at the high margin services provided by incumbents leaving lower margin products and services that are rapidly being commoditized This is happening in all industry sectors and it is the ones who are best able to adjust innovate and improve their service offerings that will survive The question is What do you need to do to ensure that your organization is one of the survivors The core of the solution to the problem is to radically improve the way the IT organization works together with the business To be clear the digital transformation of your business depends on that relatively small group of people in the basement or other out of the way location who make sure that your IT services work So building a cooperative model is vital for the success of the business Which model has proven its worth in many industries

It is the application of Lean principles that gives organizations an advantage in delivering their products and services to their customers Transforming your organization to high performance is above all a people based movement with the acquisition and most importantly application of knowledge and skills necessary for the high performance way of working at its core In teams from boardroom to work floor building a new way of thinking and acting is essential This book aims to give insight into the reasons why you and your organization must consciously act to apply Lean principles to your IT organization It explains the phases organizations go through as they start out with their initial attempts to gain advantages from Lean tools to the phase in which they reap the strategic benefits of Lean applied to IT The real work of the transformation is described from two different perspectives Leadership and Team This book describes a complete set of principles practices and tools In order to make the right decisions along the winding route of your transformation The people who will guide support and drive your transformation are the leaders and team members who understand and apply those principles practice and tools your Lean IT Experts
