product process system In many cases such innovations come from small and medium sized enterprises and so the role of the entrepreneur is key to their success The book is split into six sections The first section examines the nexus in detail focusing on system oriented connectivity between sustainability innovation and entrepreneurship The second section looks at how to nurture corporate entrepreneurship for sustainability and the third considers mature industries such as automotives chemicals and electronics and how sustainability aspects can be integrated into innovation process and strategy The fourth section examines the nexus through the lens of developing countries in Africa Sustainable entrepreneurship is identified as a hugely beneficial way to foster development The fifth section of the book concentrates on SMEs and finally the EIS nexus is approached from a network perspective and focuses on inter organisational partnerships which are often an important facilitator or spark for EIS initiatives This book will prove to be essential for researchers in the EIS nexus and be of invaluable help to practitioners governments and inter governmental bodies attempting to encourage sustainable entrepreneurship and innovation
