While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, Beeby Lonsdale demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics can illuminate the translation process. Using Spanish to English translation as her example, she presents the basic principles of translation through 29 teaching units which are prefaced by objectives, tasks, and commentaries for the teacher and through 48 task sheets which show how to present the material to students. Published in English.

Thomas Gray among the Disciplines Ruth Abbott, Ephraim Levinson, 2024-12-31

Throughout the 250 years that have passed since Thomas Gray's death, he has primarily been celebrated as a poet. This makes sense because although he published relatively little verse, he published less indeed precisely nothing of his abundant polymathic writing in other fields. His place within the history of scholarship has therefore been obscured. Like many eighteenth-century antiquaries, however, he shared his learning through correspondence and manuscript circulation and thereby influenced intellectual as well as literary life. This book explores Gray's scholarship within the changing norms of eighteenth-century disciplines, at once locating him within histories of specialisation and examining the ways in which he challenges their narratives. Scholars from across the humanities reveal his methods and global interests and analyse many newly uncovered manuscripts. Offering fresh understanding of broader fields through focused investigation of Gray's multidisciplinary writings, the book will appeal to scholars of eighteenth-century literary, intellectual, and scientific history.
