Nelson, 1994-03-15 The links between madness creative genius and spiritual experiences have tantalized philosophers and scientists for centuries In *Healing the Split* John Nelson brings the lofty ideas of transpersonal psychology down to earth so they can be applied in a practical way to explain the bizarre effects of insanity on the human mind Drawing on a vast knowledge of Eastern philosophy and mainstream neuropsychiatry he heals the split between orthodox and alternative views with a comprehensive approach that goes beyond both Starting where R D Laing and Thomas Szasz left off Nelson revises and expands their radical views in light of modern brain science He then turns to ancient tantric yoga for a synthesis that weaves brain psyche and spirit into a compelling new conception of mental

illness For professionals who seek to meet the needs of their patients more creatively this book offers a unique synthesis For people in emotional crisis it clarifies the distinctions among intractable psychosis temporary breakdowns in the service of healing spiritual emergencies and psychic breakthroughs spiritual emergence And for anyone interested in the seemingly inexplicable workings of the human mind gone mad this fascinating exploration of psychotic states of consciousness will be exciting reading

The Problem of Disenchantment Egil Asprem, 2018-05-31 Challenges the conventional view of a disenchanted and secular modernity and recovers the complex relation that exists between science religion and esotericism in the modern world Max Weber famously characterized the ongoing process of intellectualization and rationalization that separates the natural world from the divine by excluding magic and value from the realm of science and reason and fact from the realm of religion as the disenchantment of the world Egil Asprem argues for a conceptual shift in how we view this key narrative of modernity Instead of a sociohistorical process of disenchantment that produces increasingly rational minds Asprem maintains that the continued presence of magic and enchantment in people's everyday experience of the world created an intellectual problem for those few who were socialized to believe that nature should contain no such incalculable mysteries Drawing on a wide range of early twentieth century primary sources from theoretical physics occultism embryology radioactivity psychical research and other fields Asprem casts the intellectual life of high modernity as a synchronic struggle across conspicuously different fields that shared surprisingly similar intellectual problems about value meaning and the limits of knowledge *The Problem of Disenchantment* is in its entirety extraordinarily well researched argued and written representing at once the most complete and nuanced treatment of the notion of disenchantment within this network of scientific religious philosophical and esoteric discourses and currents Nova Religio

The Reenchantment of the World Morris Berman, 1981 Morris Berman's book addresses what I consider to be the most important topic at our present moment in history He is searching for the underpinnings of a new world view that can give rise to a culture capable of relating gently and self-sustainingly to the earth Frederick Ferr *The Reenchantment of the World* is a perceptive study of our scientific consciousness and a cogent and forceful challenge to its supremacy Focusing on the rise of the mechanistic idea that we can know the natural world only by distancing ourselves from it Berman shows how science acquired its controlling position in the consciousness of the West He analyzes the holistic animistic tradition destroyed in the wake of Scientific Revolution of the sixteenth and seventeenth centuries which viewed man as a participant in the cosmos not as an isolated observer Arguing that the holistic world view must be revived in some credible form before

we destroy our society and our environment he explores the possibilities for a consciousness appropriate to the modern era Ecological rather than animistic this new world view would be grounded in the real and intimate connection between man and nature Metaphors of Consciousness Ronald S. Valle,Rolf von Eckartsberg,2012-12-06 As we move into the 1980s there is an increasing awareness that our civilization is going through a profound cultural transformation At the heart of this transformation lies what is often called a paradigm shift a dramatic change in the thoughts perceptions and values which form a particular vision of reality The paradigm that is now shifting comprises a large number of ideas and values that have dominated our society for several hundred years values that have been associated with various streams of Western culture among them the Scientific Revolution of the seventeenth century The Enlightenment and the Industrial Revolution They include the belief in the scientific method as the only valid approach to knowledge the split between mind and matter the view of nature as a mechanical system the view of life in society as a competitive struggle for survival and the belief in unlimited material progress to be achieved through economic and technological growth All these ideas and values are now found to be severely limited and in need of radical revision **The Haunting of Twentieth-Century America** Joel Martin,William J. Birnes,2011-09-13 From the Nazis to the new millennium Jacket *Esalen* Jeffrey J. Kripal,2011-09-07 Jeffrey Kripal here recounts the spectacular history of Esalen the institute that has long been a world leader in alternative and experiential education and stands today at the center of the human potential movement Forged in the literary and mythical leanings of the Beat Generation inspired in the lecture halls of Stanford by radical scholars of comparative religion the institute was the remarkable brainchild of Michael Murphy and Richard Price Set against the heady backdrop of California during the revolutionary 1960s Esalen recounts in fascinating detail how these two maverick thinkers sought to fuse the spiritual revelations of the East with the scientific revolutions of the West or to combine the very best elements of Zen Buddhism Western psychology and Indian yoga into a decidedly utopian vision that rejected the dogmas of conventional religion In their religion of no religion the natural world was just as crucial as the spiritual one science and faith not only commingled but became staunch allies and the enlightenment of the body could lead to the full realization of our development as human beings An impressive new book Kripal has written the definitive intellectual history of the ideas behind the institute San Francisco Chronicle Kripal examines Esalen s extraordinary history and evocatively describes the breech birth of Murphy and Price s brainchild His real achievement though is effortlessly synthesizing a dizzying array of dissonant phenomena Cold War espionage ecstatic religiosity incongruous pairings Darwinism Tantric sex and otherwise schizy ephemera psychedelic drugs spaceflight into a cogent satisfyingly complete narrative Atlantic Monthly Kripal has produced the first all encompassing history of Esalen its intellectual social personal literary and spiritual passages Kripal brings us up to date and takes us deep beneath historical surfaces in this definitive elegantly written book Playboy *The Quantum Moment* Robert P.
