[The Early History of Railway Tunnels](#) Hubert Pragnell,2024-08-30 To the early railway traveller the prospect of travelling to places in hours rather than days hitherto was an inviting prospect however a journey was not without its fears as well as excitement To some the prospect of travelling through a tunnel without carriage lighting with smoke permeating the compartment and the confined noise was a horror of the new age What might happen if we broke down or crashed into another train in the darkness To others it was exciting with the light from the footplate flickering against the tunnel walls or spotting the occasional glimpses of light from a ventilation shaft To the directors of early railway companies planning a route was governed by expense and the most direct way Avoiding hills could add miles but tunnelling through them could involve vast expense as the Great Western Railway found at Box and the London and Birmingham at Kilsby Creating a cutting as an alternative was also costly not only in labour and time

but also in compensation for landowners who opposed railways on visual and social grounds having seen their land divided by canals Construction involved millions of bricks or blocks of stone for sufficiently thick walls to withstand collapse However the entrance barely seen from the carriage window might be an impressive Italianate arch as at Primrose Hill or a castellated portal worthy of the Middle Ages as at Bramhope This book sets out to tell the story of tunnelling in Britain up to about 1870 when it was a question of burrowing through earth and rock with spade and explosive powder with the constant danger of collapse or flooding leading to injury and death It uses contemporary accounts from the dangers of railway travel by Dickens to the excitement of being drawn through the Liverpool Wapping Tunnel by the young composer Mendelssohn It includes descriptions from early railway company guide books newspapers and diaries It also includes numerous photographs and colored architectural elevations from railway archives
