## **The Parents Guide To Hip Dysplasia:**

**The Parents' Guide to Hip Dysplasia** Betsy Miller, 2013-03-12 The Parents Guide to Hip Dysplasia is the only consumer guide to one of the most common birth defects in our nation. Now instead of having to comb through medical texts or scour the internet for information, concerned parents of children with hip dysplasia can have all the information they need for treating their children at their fingertips. Hip dysplasia affects 1 in 1,000 babies, either as developmental hip dysplasia (DDH) or congenital hip dysplasia (CDH). With this condition, the child's hip joint structure does not fit together normally, and the problem can grow worse as the child grows. If untreated, the condition can cause serious hip problems in adulthood. Fortunately, this condition responds well to medical treatment, and this book guides concerned parents through all of the options and obstacles of treating a child with hip dysplasia. The book covers hip anatomy, risk factors, how diagnosis is made, how to communicate with doctors about the condition, and covers harnesses, braces, casts, surgery, and potential complications for children ages 0-17. The book also addresses the special care needs of children with hip dysplasia and how to manage pain at home. It concludes with a list of resources. Author Betsy Miller was treated for hip dysplasia as a child and she was inspired to write this book to provide support and information to parents in an accessible, reader-friendly format. **The Parents'**

**Guide to Clubfoot** Betsy Miller, 2013-03-20 About one in every thousand babies born each year has clubfoot, a disorder that affects foot and calf muscles. Because treatment usually begins soon after birth and continues for several years, parents play a key role in the treatment of clubfoot and need to be able to communicate effectively with their child's doctor. The Parents Guide to Clubfoot is the only book about clubfoot that is written for parents so they can learn everything they need to know about their child's condition. It is an all-in-one resource with medical information, advice from parents' comments from clubfoot experts, and even an illustrated story for preschoolers that parents can read aloud to their children. Written in everyday language, the book covers clubfoot in babies and older children from diagnosis through treatment for mild to severe cases. It provides details on clubfoot, its causes, treatment, and care, along with an extensive list of resources and clubfoot assessment aids. In keeping with currently preferred treatments in the U.S., it emphasizes the Ponseti method, which minimizes surgery, and includes perspectives from Ponseti-trained clubfoot doctors and parents of children with clubfoot. However, separate chapters discuss all pre-treatment and post-treatment care options, and one chapter covers surgery and post-surgery care if it becomes necessary. Parents often have a hard time coping with the diagnosis of clubfoot in their newborn children, and this book reassures them that the condition is treatable. If treated correctly, the child's foot will look normal, and he or she will be fully able to walk, run, and play. Several world-class athletes, including Kristi Yamaguchi, Troy Aikman, and Freddy Sanchez, were born with clubfoot. The book includes advice from children with clubfoot that highlights the positive effects of having clubfoot as a child, like getting presents after surgery, and shows active pictures of them after their treatment. As mentioned, the Ponseti method of treatment, once disregarded as quackery, is the most common method of clubfoot treatment.

in the United States It involves a series of casts and braces that slowly reposition the foot To prevent a relapse these braces need to be worn until the age of four or five The book provides instruction advice and tips for caring for a child in a cast putting on the different braces required for the Ponseti method and solving common problems like bruising It also includes a useful list of signs that a child s foot is relapsing The three most important aspects of the book are 1 It reassures parents that clubfoot is treatable and that with the right treatment their child s foot will look normal and he or she will be able to walk run and play 2 It is important to find a doctor skilled in treating clubfoot with a nonsurgical approach This is called the Ponseti method after the late Dr Ponseti who developed it 3 Once a child s foot is corrected following through with brace wear as directed until the age of four or five is the best way to prevent a relapse in which the foot needs to be corrected again

When a child is diagnosed with Developmental Dysplasia of the Hip (DDH), parents experience a range of emotions and responses. They want to understand not only the condition but also what the future holds for their child. This comprehensive book covers everything you need to know about DDH from symptoms and explanations of the condition to details of the treatments involved. It also looks at what life is like when your child is in a cast as well as the emotional side of DDH, an area that is often overlooked. Natalie Trice, whose son was born with DDH, wrote *Cast Life* specifically for other parents as she knows only too well the questions that run through your mind when a diagnosis is made. This essential book doesn't bombard you with medical jargon but equips you with the knowledge and facts you need to understand and get to grips with DDH. With comments from other parents and case studies plus expert advice, *Cast Life* is a must-have book for anyone dealing with DDH. The author, Natalie Trice, regularly writes about DDH, parenting and lifestyle issues for various publications, websites and on her blog [www.justbecauseilove.co.uk](http://www.justbecauseilove.co.uk). She lives in the UK with her husband and two young sons, Eddie and Lucas. Lucas inspired this book and is still on his DDH journey. Part of the royalties from the sale of the book are donated to Spica Warrior [www.spicawarrior.org](http://www.spicawarrior.org), a UK-based charity raising awareness of DDH. **Hip, Hop, Hooray for Brooklynn!** Jill Harold, Betsy Miller, 2024-11-14

This upbeat story is about Brooklynn, a little bunny who loves to hop. Brooklynn wears a brace at night but she is determined to learn how to hop rope in time for the Hippy Hop Games. Armed with hop rope rhymes and a can-do attitude, Brooklynn shows that persistence pays off and can be a lot of fun.

**Essentials of Nursing Children and Young People** Jayne Price, Orla McAlinden, Zoë Veal, 2023-12-15.
