**The New Senior Woman** Barbara M. Fleisher, Thelma Reese, 2013-10-15 As people live longer and better lives both women and men may look forward to many years in retirement But living well in retirement depends on a variety of decisions people make as they prepare for and enter this new chapter of life and living This book is for and about women approaching and experiencing life in their senior years This largest and fastest growing part of the population is living in a manner very different from our mothers whose roles in life were much more predictable and circumscribed than ours Today's senior women live longer are healthier better educated more involved in the world and more active than the women who preceded us Figuring out these uncharted years without role models or guideposts can be challenging but here the authors gather the stories of today's senior women who have jumped hurdles answered questions and made decisions they never saw their mothers make Through these stories readers will find fellowship and guidance wisdom and acknowledgment of the challenges and triumphs that lie ahead Culled from women in their sixties and beyond and from a variety of backgrounds and current living situations the stories reveal the realities of life for retirement age women and demonstrate the dreams joys concerns and fears that come along with this phase of life They address questions about living arrangements adult children loss of a spouse or partner relationships and friendships part time work social connections health concerns and more Facing these new situations with class dignity sass and smarts these women reveal the various ways today's senior women can live and love her retirement years

*The New Senior Man* Thelma Reese, Barbara M. Fleisher, 2017-10-06 The New Senior Man Exploring New Horizons New Opportunities fills a gap that is already huge and growing Where do men fit into the astonishing changes in both life expectancy and visibility of the aging boomers among us Unlike women who move into retirement years with a network of friends and intimates cultivated over decades men for the most part do it alone Changes in women's lives and in the culture have brought changes for men who were told to man up since they were toddlers Having faced that challenge throughout their lives it's time now to do it again to see changes in the world around them as opportunities to discover new strengths and passions to make the most of the gift of time With perhaps a third of productive life ahead retirement requires redefinition Where are the role models among the men who at this critical turning point in their lives continue to redefine and reinvent their lives past the time of the proverbial gold watch and a set of golf clubs As pioneers in this rapidly emerging new world the men whose narratives appear in this book are role models for each other and those who follow They seek more than advice about investments and improving their golf strokes Men from all walks of life tell us in their own words how they see the challenges and chances that lie ahead and within themselves and how they are taking full advantage of opportunities that re start living Each chapter

presents a topic relevant to this later stage of life memory family dynamics sexual intimacy loss and independence among others Like a conversation among friends the book introduces readers to new ways of looking at the present and the future so that men may cultivate a lifestyle that not only suits them but supports a healthy rewarding and enjoyable reframing of life

**African Youth and the Persistence of Marginalization** Danielle Resnick,James Thurlow,2015-04-10 The much heralded growth and transformation of many economies in sub Saharan Africa over the last decade continues to receive prominent attention in academic scholarship and among policy practitioners An

apparent feature about this transformation however is that Africa's youth appear to have been left out. This book critically examines the extent and consequences of the marginalization of African youth. It questions conventional wisdoms about data trends, aspirational goals and common policy interventions surrounding Africa's youth that have been variously propagated in both the development studies literature and in mainstream donor policy reports. The book explores macro trends from both a temporal and cross regional perspective in order to highlight what is distinct about contemporary African youth and whether their prospects and behaviours do actually vary from their counterparts in other regions of the world or from previous generations of African youth. Such studies include cross country analyses of youth employment patterns and modes of political participation in depth examination of the behaviours and aspirations of the urban youth and critical reflections on the impact of rural employment initiatives, vocational education and learnership programmes. The incorporation of multiple methods and disciplines as well as its attention to policy issues ensures that the book will be of great interest to graduate students, researchers and professional researchers whose work lies at the intersection of African area studies and development studies as well as those focused on development economics, political science and public policy and administration.

*Reinventing the Welfare State* Ruud A. de Mooij, 2006 The Dutch welfare state is under pressure. Future trends of ageing and globalisation render public finances unsustainable and worsen the position of low skilled workers on the labour market. At the same time welfare state institutions seem insufficiently adapted to changed socio cultural circumstances. Moreover they cause inactivity among elderly workers, women and social benefit recipients. To prepare for the future the Dutch government aims to raise labour supply and improve human capital. This study explores how welfare state reform can contribute to these goals. Thereby we take into account the key social and economic functions that the welfare state fulfils in our society. We analyse a number of reforms in Dutch institutions from a broad welfare perspective and quantify their effects on the labour market and the income distribution. The study also develops three comprehensive prototype welfare state reforms for the Netherlands in the future. We explore how robust these different prototypes are for immigration, economic integration and technological change.
