Methodist University **My Loving Self and Me** C. Beth Hoffman, 2015-02-27 Nurturing our true selves acknowledging when our ego is in control and accepting God's love enables us to be lovingly caring of others. This is a challenge for adults to master in a material world but even harder for children. In *My Loving Self and Me* author C. Beth Hoffman offers a collection of stories and poems that helps children understand this concept and it gives them a jump start on their own spiritual path. The stories feature a brother and sister, Ike and Gabby, and their cousins as they encounter a variety of life experiences such as dealing with hurt, feelings, bullying, and fear. They better understand the ideas of gratitude, integrity, respect for nature, and more by finding answers through their loving connection with God. The stories presented in *My Loving Self and Me* demonstrate through Ike and Gabby's open conversations with their parents, grandparents, and each other how important communication is. Reading this book with your children, listening to what they have to say, and discussing these and other topics that may arise provides a forum for the open communication that is so valuable between parent and child.

Information Extraction: A Multidisciplinary Approach to an Emerging Information Technology Maria T.

Pazienza, 2005-08-29 Information extraction (IE) is a new technology enabling relevant content to be extracted from textual information available electronically. IE essentially builds on natural language processing and computational linguistics but it is also closely related to the well-established area of information retrieval and involves learning. In concert with other promising and emerging information engineering technologies like data mining, intelligent data analysis, and text summarization, IE will play a crucial role for scientists and professionals as well as other end users who have to deal with vast amounts of information, for example from the Internet. As the first book solely devoted to IE, it is of relevance to anybody interested in new and emerging trends in information processing technology.
