The Oxford Handbook Of Criminology 4th Edition:

The Oxford Handbook of Criminology Mike Maguire, Rodney Morgan, Robert Reiner, 2007 teachers and students of criminology and is a sourcebook for professionals

Critical Criminology in Canada Aaron Doyle, Dawn Moore, 2011-01-01 Canada's criminal justice landscape has been shaped by contrary trends in recent years. As the crime rate declines, policy makers continue to push for tough on crime legislation and university criminology programs continue to expand. Given these trends, what does the future hold for criminology and criminal justice? This book presents the work of a new generation of critical criminologists who explore the geographical, institutional, and political context of the discipline in Canada. Breaking away from mainstream criminology and popular law and order discourses, the authors present a spectrum of theoretical approaches to criminal justice, from governmentality to feminist criminology, from critical realism to anarchism, and they propose novel approaches to topics such as genocide, white collar crime, and the effect of prison sentences on families. By posing crucial questions and attempting to define what criminology should be, this book will shape debates about crime, policing, and punishment for years to come.

Embedding Human Rights in Prison Anastasia Karamalidou, 2017-04-06 This is a comparative study of prisoners' human rights in England, Wales, and the Netherlands. Over the years, changes in Dutch penal policy have smoothed to some degree the sharp contrasting differences that were once characteristic of the English and the Dutch prison systems. In this context, the study documents the impact of the two countries' penal policies on prisoners' human rights and presents prisoners' views on the human rights contribution to prison life and prisoner treatment. English and Dutch prisoners treat human rights recognition and protection as the yardstick of the prison's legitimacy in contemporary democracies. Drawing on their respective experiences, Karamalidou highlights valuable lessons on what practices to adopt and what practices to cease with a view to embedding human rights in prison. A compassionate and thought-provoking study, this book will be of interest to undergraduate and postgraduate students of penology and human rights.

Risk Assessment for Juvenile Violent Offending Anna Costanza Baldry, Andreas Kapardis, 2012-12-12 This volume is the result of an EU project involving two different European countries, Italy and Cyprus, on risk and needs assessment for juvenile violent offenders. The book is based on a longitudinal data base of juveniles who have committed violent crimes and who have been followed up after six months to measure their recidivism rate. The aim of this book is to provide practitioners who are dealing with juvenile violent offenders with scientifically based theories and knowledge derived from results about risk assessment. In particular, it shows how a newly developed and tested instrument, the EARN (European Assessment of Risk and Needs) works and how it can be used to help practitioners. Recidivism of violence in juveniles is based on several risk factors and is reduced on the basis of protective factors. Efficient legal intervention and treatment are more and more tailored according to the risk factors but also to the needs of juveniles. Juvenile Justice Systems in Europe tend to approach the juvenile who has committed a crime not only from a sanction point of view but more as an

opportunity for the juvenile his or her family and the social context in general to reduce the risk of recidivism This book will be of interest to researchers students social workers police officers and lawyers **Cybercrime and Cyber Terrorism** Tim Owen,2025-06-16 This book examines the cyber terrorist offender through social and biological theories It critiques how traditional criminology theory falls short when applied to cyber terrorism Using a four fold lens it takes into analytical consideration a cluster of psychological social genetic and neurological variables It uses multiple examples to show how this approach can be applied to selected aspects of cyber terrorism including definitions of terrorism per se forms of cyber terrorism examples of counter terrorism and attempts to combat cyber terrorism and the possible motivations for cyber terrorism This Genetic Social approach seeks to build bridges between the biological and social sciences providing an ontologically flexible more integrationalist conceptualisation of the phenomena of cyber terrorism It includes a chapter explaining how the post Covid era has changed the playing field in a way that advantages cyber terrorists and it also discusses a blueprint for a potential predictive model of cyber terrorism **Crime, Media and Culture** Greg Martin,2018-12-07 Working broadly from the perspective of cultural criminology Crime Media and Culture engages with theories and debates about the nature of media audience relations examines representations of crime and justice in news media and fiction and considers the growing significance of digital technologies and social media The book discusses the multiple effects media representations of crime have on audiences but also the ways media portrayals of crime and disorder influence government policy and lawmaking It also considers the processes by which certain stories are selected for their newsworthiness Also examined are the theoretical conceptual and methodological underpinnings of cultural criminology and its subfields of visual criminology and narrative criminology Drawing on case studies and empirical examples from the increasingly blurred worlds of reality and entertainment the dynamics of crime media and culture are illuminated across a range of chapters covering topics that include moral panics folk devils and trial by media fear of crime cop shows and courtroom dramas female criminality and child on child killing serial killers surveillance new media and policing organized crime and state crime Crime Media and Culture will be an invaluable resource for undergraduate and postgraduate students interested in criminology and media studies The book will also prove useful for lecturers and academic researchers wishing to explore the intersections of crime media and cultural inquiry **A New Response to Youth Crime** David Smith,2010 Antisocial and criminal behaviour involving children and young people have been a cause of heightened public concern in England and Wales for more than a quarter of a century It has been the subject of numerous policy papers research studies and academic assessments as well as extensive newspaper radio and television coverage This has set the context for an ever expanding volume of legislation seeking to amend and improve society s official response Yet despite a massive injection of resources into the youth justice system the results achieved have been unimpressive reoffending remains a persistent problem and the general public appears to have little confidence in the youth justice system The time is ripe therefore for a

new look at the problem of youth offending and government and society's response to this. This book accompanies the Report of the Independent Commission on Youth Crime and Antisocial Behaviour published 2010. In it, leading authorities in the field from a variety of different disciplines review youth crime and different responses to it, focussing particularly on England and Wales but also analysing for comparative purposes the nature of responses in other parts of the world, especially Canada. It will be essential reading for practitioners, policy makers, students and others with an interest in addressing one of today's most intractable social problems.

Privatising Criminal Justice Christopher Hamerton, Sue Hobbs, 2022-09-30. *Privatising Criminal Justice* explores the social, cultural and political context of privatisation in the criminal justice sector. In recent years, the criminal justice sector has made various strategic partnerships with the private sector, exemplified by initiatives within the police, the prison system and offender services. This has seen unprecedented growth in the past 30 years and a veritable explosion under the tenure of the coalition government in the UK. This book highlights key areas of domestic and global concern and illustrates with detailed case studies of important developments. It connects the study of criminology and criminal justice to the wider study of public policy, government institutions and political decision making. In doing so, *Privatising Criminal Justice* provides a theoretical and practical framework for evaluating collaborative public and private sector response to social problems at the beginning of the twenty-first century. An accessible and compelling read, this book will appeal to students and scholars of criminology, criminal justice, sociology and politics and all those interested in how privatisation has shaped the contemporary criminal justice system.

Understanding and Preventing Recidivism of Young Offenders in Argentina Mirian Susana Orlando, David P. Farrington, 2024-03-29

This book aims to advance knowledge about the recidivism of young offenders. It reviews knowledge about risk factors for recidivism and about protective factors that encourage desistance. It then reviews quantitative research on predictors of recidivism versus desistance of young offenders in Buenos Aires, Argentina, based on following up over 100 young offenders during a two-year statutory monitoring period. Numerous factors are identified that predict recidivism: family, educational, social, community, demographic, offence history, substance use history. It then presents qualitative research based on offenders' narratives using extensive verbatim quotations that explain their recidivism versus desistance. Finally, it reviews research on the prevention of recidivism of young offenders and makes recommendations based on the quantitative and qualitative analyses. This book should be of great interest to all academics, researchers, practitioners, and policy makers who are interested in juvenile offending and recidivism, including criminologists, psychologists, psychiatrists, social scientists, and criminal justice practitioners.

Crime and Criminal Justice Ian Marsh, Gaynor Melville, Keith Morgan, Gareth Norris, John Cochrane, 2011-05-09. *Crime and Criminal Justice* provides students with a comprehensive and engaging introduction to the study of criminology by taking an interdisciplinary approach to explaining criminal behaviour and criminal justice. The book is divided into two parts which address the two essential bases that form the discipline of criminology. Part One describes, discusses, and evaluates a range of theoretical approaches that have offered explanations for crime, drawing upon contributions from the disciplines of sociology, psychology, and biology. It then goes on to apply these theories to specific forms of criminality. Part Two offers an accessible but detailed review of the major philosophical aims and sociological theories of punishment and examines the main areas of the contemporary criminal justice system, including the police, the courts, and judiciary, prisons, and more recent approaches to punishment. Presenting a clear and thorough review of theoretical thinking on crime and of the context and current workings of the criminal justice system, this book provides students with an excellent grounding in the study of criminology.

Globalisation and the Challenge to Criminology Francis J. Pakes, 2013. There is no doubt that globalisation has profound effects on crime, justice, and our feelings of security, identity, and belonging. Many of these affect both the making of laws and the breaking of laws. It has been argued, however, that

criminology has been too provincial focusing as it often does on national laws and issues whilst others have said that globalisation is the stuff of international relations global finance and trade not of criminology This book disputes this by asserting that criminology has a firm place in this arena and globalisation offers the discipline a challenge that it should relish Some of the field's top scholars from the UK the US Canada Australia and New Zealand consider these challenges and present cutting edge analysis and debate Topics covered include transnational organised crime international policing and a range of other issues involving global harm such as genocide the workings of international financial institutions the fate of international migrants and the impact of anti immigration sentiments in Europe A particular focus is on borders and arrangements that deal with migration and populations that are excluded and adrift This book highlights criminology's analysis and engagement in new understandings of globalisation in particular its harmful and unethical manifestations and offers a mode of scrutiny and vigilance Globalisation and the Challenge to Criminology will be of particular interest to those studying criminology criminal justice policing security and international relations as well as those who seek to understand globalisation and in particular its harmful outcomes
