Law and Policy for a New Economy Melissa K. Scanlan, 2017-05-26 This book makes the case for a New

Environmentalism and using a systems change approach takes the reader through ideas for reorienting the economy. It addresses the laws and policies needed to support the emergence of a new economy across a variety of major areas from energy to food across common pool resources and shifting investments to capitalize locally connected and mission driven businesses. The authors take the approach that the challenges are much broader than setting parameters around pollution and go to the heart of the dominant global political economy. It explores the values needed to transform our current economic system into a new economy supportive of ecological integrity, social justice and vibrant democracy. **Between**

Preservation and Exploitation Kemi Fuentes-George, 2016-03-25. A study of biodiversity governance analyzes the factors that determine the effectiveness of transnational advocacy networks and the importance of justice claims to conservation. In the late 2000s, ordinary citizens in Jamaica and Mexico demanded that government put a stop to lucrative but environmentally harmful economic development activities: bauxite mining in Jamaica and large scale tourism and overfishing on the eastern coast of the Yucatán Peninsula. In each case, the catalyst for the campaign was information gathered and disseminated by transnational advocacy networks (TANs) of researchers, academics and activists. Both campaigns were successful despite opposition from industry supporters. Meanwhile, simultaneous campaigns to manage land in another part of the Yucatán and to conserve migratory birds in Egypt had far less success. In this book, Kemi Fuentes George uses these four cases to analyze factors that determine the success or failure of efforts by TANs to persuade policymakers and private sector actors in developing countries to change environmental behavior. Fuentes George argues that in order to influence the design and implementation of policy, TANs must generate a scientific consensus, create social relationships with local actors and advocate for biodiversity in a way that promotes local environmental justice. Environmentally just policies would allow local populations access to their lands provided they use natural resources sustainably. Justice claims are also more likely to generate needed support among local groups for conservation projects. In their conservation efforts, Jamaica, Mexico and Egypt were attempting to meet their obligations under the UN Convention on Biological Diversity and other regional agreements. Fuentes George's innovative analysis shows the importance of local environmental justice for the implementation of international environmental treaties. **Architect's Legal Pocket Book** Matthew Cousins, 2025-07-22. Frog Town Laurence Armand French, 2014-07-08 Frog Town describes in detail a French Canadian parish that was unique due to the high density of both Acadian and Quebecois settlers that were situated in a Yankee stronghold of Puritan stock. This demography provided for a volatile history that accentuated the inter ethnic sectarian conflicts of the time. In this book Laurence Armand French discusses the work language and social activities of the working class French Canadians during the changing times that transformed them from French Canadians to Franco Americans. French also articulates the current double standard of justice within New Hampshire with details of actual cases presented alongside their circumstances and judicial outcomes to offer a thorough depiction of the community of Frog Town.
