central to capitalism and to our many sustainability crises Could we remake money so as to advance sustainable economies and fair societies A growing number of scholars politicians and activists think we can and they are doing it from the bottom up This book examines how grassroots groups municipalities and radical crypto entrepreneurs are remaking money by designing and organising complementary currencies It argues that in their novel ideas and governance practices lie the key for building green and inclusive economies Engaging imaginatively with the future of money this accessible book will appeal to anyone interested in constructing a more sustainable and just world Popular Mechanics ,1981-11 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle Austrian Economics, Money and Finance Thomas Mayer,2017-11-10 The financial crisis has exposed severe shortcomings in mainstream monetary economics and modern finance It is surprising that these shortcomings have not led to a wider debate about the need to overhaul these theories Instead mainstream economists have closed ranks to defend existing theories and public authorities have expanded their interference in markets This book investigates the problems associated with mainstream monetary economics and finance and proposes alternatives based on the Austrian school of economics This school emanated from the work of the nineteenth century Austrian economist Carl Menger and was developed further by Eugen von B hm Bawerk Ludwig von Mises and Friedrich August von Hayek In monetary economics the Austrian school regards the creation of money by banks through credit extension as a key source of economic instability From this follows the need for a comprehensive reform of our present monetary system In a new monetary order money could be issued by both public and private institutions and there would be no need for fractional reserve banking Instead of creating money banks would intermediate it In finance the Austrian school rejects the notion of rational expectations and measurable risk Individuals use their subjective knowledge to gather and evaluate information and they act in a world of radical uncertainty Hence markets are not efficient nor can portfolios be built on the basis of known probability distributions of asset prices as described in the modern finance literature This book explores the need for a new theoretical foundation for asset pricing and investment management that will give practitioners more useful orientation
