Coon Trap STEM Challenge

One day you've just walked outside to take out the garbage and discovered a huge mess. A pretty raccoon has gotten into your garbage can again, and you weren't enough. You decide to take matters into your own hands by researching raccoons and designing a device to trap the raccoon and eat it free in the woods.

Your Task:

- Identify the problem (what problem are you trying to solve?)
- Research (what do you need to learn about raccoons to solve the problem? what do you need to research about your trap to make it better?)
- Design and build (what design constraints might you have?)
- Test (what includes tests?)
