Whirlpool Air-Flow® units contain an air filter and a charcoal deodorizer filter. These filters are located inside the refrigerator compartment. Regularly changing these filters is important to ensure that an efficient operating refrigerator has a better environment for you.

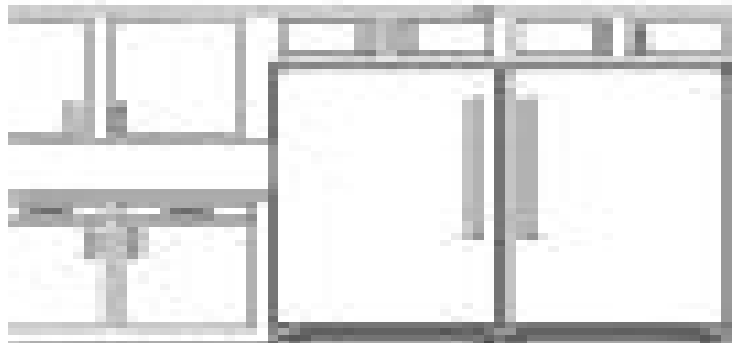

When the refrigerator is not in operation, please do not leave the door open continuously. Leaving the door open causes the inside of the refrigerator to become too warm, increasing the risk of food spoilage. Please do not use the refrigerator as a storage area for flammable or volatile liquids, such as gasoline, kerosene, or alcohol. These liquids can evaporate and cause a fire or explosion.
