standardized training and methodology for use in evidentiary and investigative casework This book fills that void serving as one of the first to describe the current state of practice capabilities and limitations and to outline methods standards of practice and expectations of the gait analyst as a forensic practitioner Forensic Gait Analysis reflects current research and forensic practice and will serve as a state of the art guide to the use of gait analysis in the forensic context for both education and training purposes It will be a welcome addition to the libraries of professionals in the areas of podiatry gait analysis forensic video analysis law enforcement and legal practice *Forensic Gait Analysis* Haydn D. Kelly, 2020-05-11 Forensic Gait Analysis examines the intersection of podiatric medicine with forensic investigation that which links or dissociates a suspect to a crime through analysis of their gait that is their movement how an individual walks runs and bends This book provides a concise explanation of how an individual's gait and biomechanics are forensically analysed and compared using video imagery in the process of human identification and investigations Along with the presentation and delivery of material with case law references illustrating the use of expert evidence Gait analysis is a long standing component of the diagnostic and therapeutic tool set of medical disciplines although the knowledge goes back much further The area has also captured the interest of technology engineers and others as the development and use of forensic gait analysis as an investigative and evidential device continues to widen Features Presents succinct knowledge on forensic gait analysis 100 illustrations with photographs and diagrams over 850 references Considers the technical and scientific basis of the field including the history of gait musculoskeletal neurology emotions and gait forensic statistics photogrammetry and recognises the trajectory of development into IT and software solutions Coverage on CCTV imagery and other video footage for use in the process of identification and investigations Details are provided on report writing and giving expert evidence in the legal systems Contributors across all subject areas This definitive fully referenced text on Forensic Gait Analysis is a welcome publication for healthcare professionals lawyers counsel investigators forensic practitioners and students wishing to know more on the subject and this growing domain

Analysing Data from Capacitive Floor Sensors for Human Gait Assessment Using Artificial Neural Networks Raoul Hoffmann, 2023 Gait analysis is valuable in medical research and diagnosis by delivering information that helps in choosing methods of intervention and rehabilitation that are beneficial for a patient In gait laboratories cameras or IMUs are often used to gather gait patterns This thesis explores the possibility of using sensors below the floor as a gait data source These sensors measure changes in the electrical capacitance to recognise steps The construction is designed for indoor environments and is hidden under common flooring layer types Therefore it is very robust and suitable for practical use in daily clinical routine A formal framework was developed to represent the measurements considering the special characteristics of this floor sensor The data were then used as input for artificial neural networks that were applied on classification and regression tasks In a feature construction and extraction approach the spatial spread of footfalls was derived and used with a feed forward neural network Then in a feature learning approach the time series data

was transformed into a local receptive field and used with a recurrent neural network Three studies were conducted for the goals to distinguish between people with low and high risk of falling to estimate age and to recognise walking challenges as an external gait intervention The combination of a robust and hidden floor sensor and machine learning opens up the prospect of future applications in health and care
