The Palgrave Handbook of Disciplinary and Regional Approaches to Peace Oliver Richmond,Sandra Pogodda,Jasmin Ramovic,2016-03-15 In this handbook a diverse range of leading scholars consider the social cultural economic political and developmental underpinnings of peace This handbook is a much needed response to the failures of contemporary peacebuilding missions and narrow disciplinary debates

both of which have outlined the need for more interdisciplinary work in International Relations and Peace and Conflict studies. Scholars, students, and policymakers are often disillusioned with universalist and northern dominated approaches and a better understanding of the variations of peace and its building blocks across different regions is required. Collectively, these chapters promote a more differentiated notion of peace employing comparative analysis to explain how peace is debated and contested.

Borderland Battles Annette Idler, 2019. This book argues that borderlands intensify security threats at the conflict-crime nexus. It demonstrates the multiple insecurities that arise from complex interactions among rebels, criminals, and other violent non-state groups. Challenging urban biases and state-centric views, it draws on unprecedented multi-year fieldwork in the war-torn, marginalized Colombian, Ecuadorian, and Colombian Venezuelan borderlands.

The Short Guide to International Development Nick Sage, 2022-07-19. International development is a vibrant interdisciplinary area of the social sciences. This Short Guide offers a uniquely succinct and balanced account of this politically charged subject. It distills both the classic and newer debates together in a clear framework and illustrates them with contemporary examples. Designed to introduce a wide readership to international development, the book considers how far the field has been reconfigured over time and to what extent it is likely to change in the future. Reviews contemporary topics including tourism, migration, and digital technologies, includes distinctive international case studies and examples. By providing a succinct evaluation of competing approaches to and perspectives on the idea and practice of international development, this book offers students across the social sciences a distinct and invaluable introduction to the field.

Integral Human Development Séverine Deneulin, Clemens Sedmak, 2023-08-15. This volume brings into conversation two major moral traditions in the social sciences and humanities that offer common areas for understanding, interpreting, and transforming the world. Over the last decade, moral theologians who work on issues of poverty, social justice, human rights, and political institutions have been finding inspiration in the capability approach (CA). Conversely, social scientists who have been working on issues of poverty and social justice from a CA perspective have been finding elements in the Catholic social tradition (CST) to overcome some of the limitations of the CA, such as its vagueness regarding what counts as a valuable human life and its strong individual focus. Integral Human Development brings together for the first time social scientists and theologians in dialogue over their respective uses of CST and CA. The contributors discuss what their mutual grounds are, where they diverge, and where common areas of collaboration and transformative action can be found. The contributors offer a critical analysis of CA from the perspective of theology. They also provide an original account of CST. The book offers a broader historical, biblical, social, economic, political, and ecological understanding of CST than that which is currently available in the CST literature. The book will interest students and practitioners in global affairs, development studies, or the social sciences who seek to better understand the Catholic tradition and its social teachings and what they can offer to address current socio-environmental challenges.

For many Africa is regarded as a place of mystery and negative images where reports of natural disasters and civil strife dominate media attention with relatively little publicity given to any of the continent's more positive attributes. Africa has at last begun to receive the depth of interest it has long deserved in the shape of debates about trade aid and debt, the Make Poverty History campaign and the UK's Commission on Africa. But behind the superficial media façade Africa is a diverse, complex and dynamic place with a rich history and a colonial engagement that although short-lived was fundamental in determining the long-term future of the continent. At the start of the second decade of the twenty-first century when the world is engulfed in a major financial crisis, Africa has the dubious distinction of being the world's poorest continent. This book introduces and demystifies Africa's diversity and dynamism and considers how its peoples and environments have interacted through time and space. The background and diversity of Africa's social, cultural, economic, political and environmental systems is examined as well as key development issues which have affected Africa in the past and are likely to be significant in shaping the future of the continent. These include the impact of HIV/AIDS, sources of conflict and post-conflict reconstruction, the state and governance, the nature of African economies in a global context and future development trajectories. *Africa: Diversity and Development* is a refreshing interdisciplinary text which enhances understanding of the background to Africa's current position and clarifies possible future scenarios. It is richly illustrated throughout with diagrams and plates and contains a wealth of detailed case studies and current data.
