Universities Guide 2009:

EBOOK: Managing Successful Universities Michael Shattock, 2010-09-16 There is no truer text to the topic than *Managing Successful Universities*. The second edition is a full revision in which globalisation, managing financial disjuncture and the enhancement of research performance all loom larger than before. Like its predecessor, this book will be used throughout the English speaking world and beyond. Professor Simon Marginson, Centre for the Study of Higher Education, University of Melbourne. This is the manual par excellence for modern university leadership and management. In my role as a business school dean, it is by far the most useful single book I have ever read and continue to read. Professor Mark Taylor, Dean Warwick Business School, University of Warwick. When I began my career in university management, there was just one book on managing UK universities. Now there must be twenty or thirty, but none is as comprehensive, authoritative, readable and important as Shattock's *Managing Successful Universities*. Read this valuable book and learn much from it. David Palfreyman, Director of OXCHEPS and Bursar, New College, University of Oxford. This bestselling book defines good management in a university context and how it can contribute to university success. Extensively updated to reflect political, financial and social developments since the first edition, it includes a new chapter on the management of teaching and research and gives in depth coverage to managing retrenchment and the importance of human resource management. Drawing on the literature of management in the private sector as well as from higher education and on the experience of the author, it emphasizes the holistic characteristics of university management. The need to be outward looking and entrepreneurial in management style and the ways successful universities utilize the market to reinforce academic excellence.

David Andrew Turner, 2012-01-01 The quality of higher education is a hot topic especially as students around the world are asked to pay more towards their own education and expect to get what they pay for In addition league tables both national and international have come to dominate discussion with several governments and many institutions setting themselves the goal of improving their ratings In this volume Professor Turner examines the assumptions that are being made about what counts as quality and what the traditional purposes of universities are But with the growth of mass higher education and the rise of student centred approaches to learning and teaching it has become increasingly clear that high quality education is education that meets the needs of the student at that particular moment and promotes their future development After examining a range of different approaches to the quality of higher education and its measurement Professor Turner develops an approach to benchmarking and quality enhancement that is better suited to the ethos of individualised learning and uses it to critique the philosophies that have dominated debates about quality to date This book will be of interest to scholars of higher education but also has something important to add to debates that engage policy makers in higher education It provides a background to the historical development of universities which might help postgraduate students and new members of faculty understand the process in which they are engaged Internationalisation of African Higher Education

Chika Sehoole, Jane Knight, 2013-10-30 The role of higher education especially the international dimension is given little importance in the discourse on achieving the Millennium Development Goals MDGs in Africa This book aims to change that The potential of higher education's contribution to Africa's development remains unrealized and often misunderstood In today's globalised world which prioritises economic growth through liberalised trade and competitive market strategies much emphasis has been placed on higher education's ability to produce graduates to serve the labour market and produce new knowledge for the knowledge economy While these are important contributions the book argues that international higher education and new knowledge must go beyond economic purposes and serve the human and social development needs of the continent It is against this background that the African Network for the Internationalisation of Education ANIE undertook research on the international dimension of higher education in Africa and its role in the achievement of the MDGs Through empirical research seven case studies address how international and regional higher education programmes and policies in African universities can address MDG priorities of promoting gender equality and women's empowerment combating HIV AIDS and establishing global partnerships for development through academic mobility joint research initiatives curriculum innovation and policy development Creating the Ethical Academy Tricia Bertram
