Uncovering Memory Tanja Sakota, 2023-03-01 My interest in site specific research is not random My mother escaped through the sewers of Breslau Germany in 1945 today known as Wroclaw Poland My father was born in a country that no longer exists Their final destination was Johannesburg South Africa This is where I enter the narrative I was born during apartheid and my interest in memory and identity is a result of my historical and political context Each one of us comes with a history a complex web of DNA and a library of information that shapes who we are and how we view the world How can we use our own complexities not only to engage with one another but to build it for story content As an artistic researcher filmmaker and educator Tanja Sakota has often thought how to bring this subjective experience into pedagogical practice Using paired themes of memory and forgetting segregation and migration perpetrators and victims Sakota travels along a timeline of memory as she takes us on a journey through South Africa Germany Poland and Bosnia Herzegovina Using a camera and short film techniques she hosts several workshops focused on interacting and engaging with remembering through different memory sites The author sits at the core but the book is an interdisciplinary work shaped around films made by different participants using the camera to access and unveil personal interpretations of space and place Questions that underpin the uncovering of memories are How does one use a camera to unmask invisible memories hidden within sites How does one remember events that one hasn't necessarily experienced How does one use film to interrogate the past from the future present As the journey evolves workshop participants and readers alike enter into a conversation around practice based research autoethnography and film *Uncovering Memory* is not a handbook offering a prescriptive method Instead it is a pedagogical text that offers an interactive approach for students and peers to consider adapt or react to in their own teaching and learning practices The narrative encourages readers to self reflect as they explore their own memory using the camera and short film format as an engaging tool for research and knowledge production

Partnership and Transformation Leda Stott, 2022-11-24 Over the last 30 years partnership has received growing attention across a range of sectors and disciplines Widely used to describe a relationship in which different actors pool their resources knowledge and skills to address common problems partnership is currently presented as central to the achievement of more inclusive and sustainable development Rejecting one size fits all approaches and mindful of different understandings of the term *Partnership and Transformation: The Promise of Multi stakeholder Collaboration* in Context which is designed to appeal to both academics and practitioners alike argues that partnership must be understood in relation to specific contexts and the added value it may offer for individuals organisations and wider society It is further suggested that the transformational potential of partnership rests critically upon a move away from purely instrumental considerations of its worth to a deeper appreciation of its intrinsic value as a process based on interpersonal relationships A

stronger balance between pragmatic and reflective dimensions of partnership can the author claims enhance opportunities for meaningful deliberation and productive conflict and contribute to the systems change needed for a global citizenship that embraces human well being and stewardship of the planet
