Capitalism and Environmental Collapse Luiz Marques, 2020-08-17 This book intends to be an alert to the fact that the curve measuring environmental costs against the economic benefits of capitalism has irreversibly entered into a negative phase The prospect of an environmental collapse has been evidenced by the sciences and the humanities since the 1960s Today it imposes its urgency This collapse differs from past civilizations in that it is neither local nor just civilizational It is global and occurs at the broadest level of the biosphere accelerated by the convergence of different socio environmental crises such as Earth energy imbalance climate change and global warming Sea level rise Decrease and degradation of forests Collapse of terrestrial and aquatic biodiversity Floods droughts wildfires and extreme weather events Degradation of soils and water resources Increase in pollution caused by fossil fuels and coal Increase in waste production and industrial intoxication The book is divided in two parts In the first part it presents a comprehensive review of scientific data to show the already visible effects of each of the different environmental crises and its consequences to human life on Earth In the second part Luiz Marques critically discusses what he calls the three concentric illusions that prevent us from realizing the gravity of the current socio environmental crises the illusion of a sustainable capitalism the illusion that economic growth is still capable of providing more well being and the anthropocentric illusion Finally Marques argues that fitting back into the biosphere will only be possible if we dismantle the expansive socioeconomic gear that has shaped our societies since the 16th century by moving from a Social Contract to a Natural Contract which takes into account the whole biosphere According to him the future society will be post capitalist or it will not be a complex society and even perhaps we must fear no society at all This book is backed up with the latest and best science and has made the complexities understandable for the average reader all in a context of hope for the future William J Ripple PhD Distinguished Professor of Ecology Director of the Alliance of World Scientists Oregon State University [Handbook of Research on Protecting and Managing Global Indigenous Knowledge Systems](#) Tshifhumulo, Rendani, Makhanikhe, Tshimangadzo Justice, 2021-10-08 Indigenous knowledge systems IKS are a combination of knowledge systems encompassing technology social economic and philosophical learning or educational legal and governance systems The lack of

documentation of these systems presents a problem as the knowledge is fading away over time In response it is essential that policies and strategies are undertaken to ensure that these systems are protected and sustained for generations to come The Handbook of Research on Protecting and Managing Global Indigenous Knowledge Systems is a comprehensive reference source that works to preserve indigenous knowledge systems through research Focusing on key concepts such as tools of indigenous knowledge management and African indigenous symbols the book preserves and promotes indigenous knowledge through research and fills the void staff and students within the field of indigenous knowledge systems face with the current lack of research and resources This book is ideal for university students lecturers researchers academicians policymakers historians sociologists and anyone interested in the field of indigenous knowledge systems
