University Of Fort Hare Entry Requirements 2015:

Decoloniality, Language and Literacy Carolyn McKinney, Pam Christie, 2021-12-20 Through a range of unconventional genres representations of data and dialogic reflective narratives alongside more traditional academic genres this book engages with contexts of decoloniality and border thinking in the Global South It addresses processes of knowledge production and participation in the highly divided and unequal schooling and higher education system in South Africa and highlights the consequences of the monolingual myth in post colonial education demonstrating opportunities for learning provided by translanguaging It explores both embodied multimodal and multilingual instances of knowledge making in teaching and teacher education that take place outside but alongside formal classroom lecture and seminar modes and the positionality and learning experiences of teacher educators in science literacy and language across the curriculum The book is not only transdisciplinary but also captures the learning that takes place beyond the borders of disciplines and formal classroom spaces

Going to University Case, Jennifer, Marshall, Delia, 2018-02-09 Around the world more young people than ever before are attending university Student numbers in South Africa have doubled since democracy and for many families higher education is a route to a better future for their children But alongside the overwhelming demand for higher education questions about its purposes have intensified Deliberations about the curriculum culture and costing of public higher education abound from student activists academics parents civil society and policy makers We know from macro research that South African graduates generally have good employment prospects But little is known at a detailed level about how young people actually make use of their university experiences to craft their life courses And even less is known about what happens to those who drop out This accessible book brings together the rich life stories of 73 young people six years after they began their university studies It traces how going to university influences not only their employment options but also nurtures the agency needed to chart their own way and to engage critically with the world around them The book offers deep insights into the ways in which public higher education is both a private and public good and it provides significant conclusions pertinent to anyone who works in and cares about universities

Ingrassia, 2024-02-06

How a speedway became a legendary sports site and sparked America's car culture. The 1909 opening of the Indianapolis Motor Speedway marked a foundational moment in the history of automotive racing. Events at the famed track and others like it also helped launch America's love affair with cars and an embrace of road systems that transformed cities and shrank perceptions of space. Brian Ingrassia tells the story of the legendary oval's early decades. This story revolves around Speedway cofounder and visionary businessman Carl Graham Fisher, whose leadership in the building of the transcontinental Lincoln Highway and the iconic Dixie Highway had an enormous impact on American mobility. Ingrassia looks at the Speedway's history as a testing ground for cars and airplanes, its multiple close brushes with demolition, and the process by which racing became an essential part of the Golden Age of Sports. At the same time, he explores how the track's past reveals the potent links between sports capitalism and the selling of nostalgia, tradition, and racing legends. **Computerworld**, 1978-03-13

Computerworld's award-winning Web site, Computerworld.com, twice monthly publication, focused conference series, and custom research form the hub of the world's largest global IT media network. **Climate Change Adaptation, Resilience and Hazards** Walter Leal Filho, Haruna Musa, Gina Cavan, Paul O'Hare, Julia Seixas, 2016-07-28

This book analyses the links between climate change adaptation, resilience, and the impacts of hazards. The contributors cover topics such as climate change adaptation in coastal zones, the evaluation of community land models, climate change considerations in public health, and water resource management, as well as conceptual frameworks for understanding vulnerabilities to extreme climate events. The book focuses on a variety of concrete projects, initiatives, and strategies currently being implemented across the world. It also presents case studies, trends, data, and projects that illustrate how cities, communities, and regions have been striving to achieve resilience and have handled hazards. *Stage Lighting* Richard E. Dunham, 2015-10-30

The book's organization follows a layered approach that builds on basic principles. Light as a Medium, Part 1: Tools of a Lighting Designer.

Part 2 Design Fundamentals Part 3 and Lighting Applications Part 4 This presents students with a practical and logical sequence when learning basic concepts The full spectrum of the lighting design process is presented in detail giving students an example of how one might develop a lighting design from script analysis through concept and plot development and all the way to an opening This detailed process with a step by step design approach gives students a plan to work from which they can later modify as they mature and gain confidence as designers The text contains a more comprehensive discussion of basic technology light as a physical phenomena and methodology of designs than is found in most introductory texts bridging the gap between introductory and advanced lighting courses The text will appeal to theatrical designers who want to venture into areas of lighting like architectural or virtual lighting design while at the same time gaining a solid grounding in the fundamentals of lighting design Lighting Design will also benefit illuminating engineers who want to move away from mere computational approaches in lighting and on to explore techniques along the design approaches of theatrical lighting design The final 9 chapters cover many specialty areas of lighting design highlighting the unique and shared qualities that exist between the different aspects of these elements Discussions involve traditional entertainment areas like theatre as well as lesser known facets of the industry including film video landscape lighting retail museum lighting virtual lighting concert spectacle performances and architectural lighting Models of design tasks demonstrate the actual use and development of plots sections schedules photometrics tables and cut sheets rather than simply talking about what they are This hands on approach provides students with a firm understanding of how to actually use these tools and processes Chasing Ghosts

John Mueller, Mark Stewart, 2015-11-04 Since 2001 the United States has created or reorganized more than two counterterrorism organizations for every apprehension it has made of Islamists apparently planning to commit terrorism within the country Central to this massive enterprise is what the FBI frequently calls ghost chasing the efforts by police and intelligence agencies to follow up on over ten million tips Less than one alarm in 10 000 fails to be false the rest all point to ghosts And the vast majority of the leads deemed to be productive have led to terrorist enterprises that are either trivial or at most aspirational As John Mueller and Mark G Stewart suggest in Chasing Ghosts it is often an exercise in dueling delusions an extremist has delusions about changing the world by blowing something up and the authorities have delusions that he might actually be able to overcome his patent inadequacies to do so Chasing Ghosts systematically examines this expensive exhausting bewildering chaotic and paranoia inducing process It evaluates the counterterrorism efforts of the FBI the National Security Agency the Department of Homeland Security and local policing agencies In addition it draws from a rich set of case studies to appraise the capacities of the terrorist adversary and to scrutinize the myth of the mastermind Mueller and Stewart also look closely at public opinion a key driving force in counterterrorism efforts The chance that an American will be killed by a terrorist within the country is about one in four million per year under present conditions However poll data suggest that although over a trillion dollars has been spent on domestic counterterrorism since 2001 Americans say they

do not feel safer No defense of civil liberties is likely to be effective as long as people and officials continue to believe that the threat from terrorism is massive even existential The book does not argue that there is nothing for the ghost chasers to find the terrorist adversary is real and does exist The question that is central to the exercise but one the ghost chasers never really probe is an important and rather straight forward one is the chase worth the effort Or is it excessive given the danger that terrorism actually presents As Chasing Ghosts shows in vivid detail standard evaluative procedures suggest that the costs often far outweigh the benefits **Commonwealth Universities Yearbook** ,2007
