The gate is a wide, low-profile concrete structure with the university's name inscribed in large, black, sans-serif capital letters. It is supported by two large, square concrete pillars on either side, each featuring a grid of small, square windows. The road leading through the gate is paved and flanked by yellow and black striped bollards. In the background, there are lush green trees and a clear blue sky with some light clouds. A street lamp is visible on the left side of the frame.

Idriss Lahai, Helen Ware, 2020-06-09 This book examines the various ways in which some fragile states in the Global South or states with limited statehood have adopted and adapted to processes of governance in their quests to address the socialized problems affecting their societies. It tells the story of these states' resilience in the societal adaptation to a liberalized notion of governance. In addition to comparative case studies, the book also analyzes the engendered interplay of culture, economics, and politics in the creation of people-centric governance reforms. The contributing authors shed light on weak states' often constructive engagement in the promotion of state governance under a variety of societal conditions, adverse or otherwise, and on their ability to remain resilient despite the complexities of the political and economic challenges they face.
