Psychosocial Effects of Isolation and Fear of Contagion of COVID-19 on the Mental Health of Different Population Groups María Cristina Richaud, Rubén N. Muzio, Viviana Noemí Lemos, Sebastian Urquijo, Gustavo Carlo, 2022-10-25 *Plant Biotechnology and Genetics for Sustainable Agriculture and Global Food Security* Galal Bakr Anis, Yinglong Chen, Baohong Zhang, 2024-09-12 According to the World Food Programme 135 million suffer from acute hunger largely due to man made conflicts climate change and economic downturns The COVID 19 pandemic could now double that number putting an additional 130 million people at risk of suffering with acute hunger Moreover food insecurity and low dietary quality cause huge public health problems Malnutrition is responsible for physical and mental development impairments various infectious diseases and unacceptably high numbers of premature deaths Since the Green Revolution a constant increase in crop productivity have experienced however there is concern that yield improvement is not enough Current rate of annual yield increases for major crops ranges between 0.8-1.2 % which needs to be doubled to feed the ever increasing human population The classical breeding techniques contributed toward the development of superior crop varieties which helped in achieving food security for ever increasing human population However with the passage of time these classical breeding approaches are lagging to meet global food requirements and scientists are working on novel plant breeding techniques NPBTs and other breakthrough agricultural techniques to reduce hunger Recently OMICs genome wide association studies GWAS QTL mapping Next Generation Sequencing NGS and genome editing GE approaches etc have proven to be powerful tools that we have at our disposal to overcome substantial obstacles in the way of efficiency and productivity of current agricultural practices In addition recently there has been a rapid development of online forums methods protocols and application strategies for genome based techniques and their applications for crop improvement

Overcoming Breast Cancer Therapy Resistance Zodwa Dlamini, 2024-06-03 This book addresses the pressing problem of drug resistance in the treatment of breast cancer It provides a comprehensive understanding of the complex mechanisms underlying drug resistance and presents the latest advances in therapeutic approaches to overcome this enormous challenge The book begins with an introduction to the biology of breast cancer treatment modalities and the mechanisms of drug resistance This includes the principles of drug resistance in targeted immune endocrine and chemotherapy In the following sections the authors present innovative strategies to overcome drug resistance and new research directions among others the role of the microbiome in drug resistance molecular profiling of patients for personalized medical care and new drug delivery systems Finally the book concludes with a discussion of the differences in the prevalence and treatment success of breast cancer between high and low income countries This book is an informative resource for students researchers and clinicians in the field of breast cancer research and oncology in general *Advanced Materials for Solid State Lighting* Vijay Kumar, Vishal Sharma, Hendrik C. Swart, 2023-07-25 This book highlights the

synthesis luminescence and applications of rare earth doped phosphors materials for solid state lighting Solid state lighting is turning into a leading technology in the lighting industry permitting improvement in the fields from architectural to domestic applications Driven with the aid of using ongoing multi field research solid state lighting needs an improvement of various technologies efficient and reliable light emitting devices devices for new functionalities and optical solutions for beam shaping Noteworthy research endeavors were aimed to find out eco friendly better performance cost and energy efficient phosphor materials for the application in solid state lighting devices Power phosphor materials with advanced optical and photoluminescence properties in a wide range of areas have shared the research efforts in this sector aimed in the direction of achieving better material features Rare earth ion doped phosphor materials have been the subject of scientific interest because of their significant applications in a variety of fields such as display devices temperature sensors solar cells bio imaging and optoelectronics devices This book covers the broad aspects of organic and inorganic materials based on phosphor materials and is beneficial to researchers involved in these areas This book is specially designed to provide an introductory concept of luminescent materials particularly man made artificial phosphors in a language comprehensible to beginners and students The book also includes some new materials with promising technologies and upgraded properties that expose new potential possibilities are also highlighted

Plant Parasitic Nematode-Host Interactions: Mechanisms and Exploitative Management Strategies Andressa Machado ,Mario Massayuki Inomoto,Victor Hugo Moura De Souza,James Price,2025-01-23 Plant parasitic nematodes PPN are pathogens common in global agricultural systems There is at least one species of PPN for all major food crops and yield losses caused by nematodes threaten global food security Management of PPN is challenging and varies greatly between different countries crops and nematodes However a recurring theme for management is improving understanding of the nematode host interaction Exploiting this information could help create better PPN control methods lessening losses associated with PPN by providing more economical and sustainable solutions Interpreting mechanisms fundamental to host parasite interactions is a rapidly evolving area This research offers novel insights about PPN biology and potential routes for exploiting this data for the development of improved PPN control Nematode effector proteins are core components of parasitism and disease development Resistant plants can suppress PPN through a variety of different mechanisms upon recognition of effectors Understanding targets of these proteins and modifying them using gene editing techniques could assist host resistance

Nanoelectrocatalysts for Energy and Water Treatment Kumar Raju,Katlego Makgopa,Kwena D. Modibane,Eric Lichtfouse,2024-05-20 Nanomaterials have recently garnered significant attention and practical importance for heterogeneous electrocatalysis This book presents recent developments in the design synthesis and characterisation of nanostructured electrocatalytic materials with a focus on applications to energy and wastewater treatment Electrocatalytic nanomaterials can enhance process efficiency and sustainability thus providing innovative solutions for a wide array of areas

such as sustainable energy production conversion and wastewater treatment Readers will gain insights into the latest breakthroughs in electrocatalysis and the activity of nanomaterials in energy conversion applications e g fuel cells hydrogen production water splitting and electro photocatalytic water splitting as well as for wastewater treatment The book explores the development of advanced electrocatalysts particularly hybrid materials

Transforming Prostate Cancer Care Zodwa Dlamini,2024-08-15 This book is an in depth examination of the current state of the art and new advances in prostate cancer care and offers a fresh perspective with insights from Africa At its core the book tackles pivotal questions such as the mechanisms behind prostate cancer development the significance of early detection and how diagnostic advancements can lead to personalized treatment plans It delves into genomic discoveries that are paving the way for targeted therapies and examines how immunotherapy is reshaping treatment paradigms Furthermore it explores surgical innovations and the role of radiopharmaceuticals in advancing prostate cancer management The discussion extends to integrative care models that emphasize holistic patient well being and strategies for enhancing survivorship Unique about this book is that the authors provide insights from Africa into the prevalence and management of prostate cancer and place this in a global context Aimed at healthcare professionals involved in oncology and prostate cancer research including physicians nurses and medical researchers this book serves as an indispensable guide to the basic biological concepts of prostate cancer and its treatment in the clinic
