around the country in opposition against the Federal Government of Nigeria The international and modernist style architecture and the fact that the government spent tens of billions of dollars constructing this idealized capital ended up causing more strife and conflict For groups like Boko Haram a Nigerian Al Qaida affiliate organization and other smaller ethnic groups seeking to have a say in how the country s oil wealth is spent Abuja symbolized everything in Nigeria they sought to change By examining the creation of the modernist national public spaces of Abuja within a broader historical and global context this book looks at how the successes and the failures of these spaces have affected the citizens of the country and have in fact radicalized individuals with these spaces being scene of some of the most important political events and terrorist targets including bombings and protest rallies Although focusing on Nigeria s capital the study has a wider global implication in that it draws attention to how postcolonial countries that were formed at the turn of the twentieth century are continuously fragmenting and remade by the emergence of new nation states like South Sudan *Handbook of Research on New Media, Training, and Skill Development for the Modern Workforce* Mentor, Dominic,2022-05-13 The abrupt shift to online learning brought on by the COVID 19 pandemic revealed the need for the adoption and application of new media virtual training and online skill development for the modern workforce However organizations are grappling with unanticipated complexities and many have recognized the gaps between online and in person competencies and capabilities with unaddressed needs There is an urgent need to bridge this gap and organically grow engagement and connectedness in the digital online space with new media tools and resources The Handbook of Research on New Media Training and Skill Development for the Modern Workforce exhibits how both business and educational organizations may utilize the new media computer technology to best engage in workforce training It provides the best practices to aid the transition to successful learning environments for organizational skill development and prepare and support new media educational engagement as the new norm in all its forms and finer nuances Covering topics such as occupational performance assessment personal response systems and situationally aware human computer interaction this major reference work is an essential tool for workforce development organizations business executives managers communications specialists students teachers government officials pre service teachers researchers and academicians South Africa Survey ,1997 **Refugee Participation Network** ,1997 **Tropentag 2022 – International Research on Food Security, Natural Resource Management and Rural Development** Eric Tielkes,2022-09-09 Tropentag is the largest interdisciplinary conference in Europe focused on developmentoriented research in the fields of tropical and subtropical agriculture food security natural resource management and rural development Tropentag takes place annually even though the past two years were particularly challenging while the conference had to be organised as an online only event One of the lessons that we learnt from the virtual conferences is that yes it is possible to organise it that way but that it is much better to meet and talk in person We are thus very happy that this year two years after what was initially planned we are able to organise the
