Zuxing Chen,2022-11-03 Not long after the Wenchuan Earthquake occurred on May 12 2008 Zuxing and his family were sent by their church to help those victims for three months where they met Paulo a house church leader from northeast area of China Paulo is a man of action he dreamed big even though the beautiful dream a big project to help the earthquake victims did not come true finally They became good friends and fellow co workers They even shared the same apartment for two months Zuxing knew that Paulo might not be satisfied with him since Zuxing did not give as much money from the relief fund to support his dream project as ZuxingaEUR tm s senior pastor promised to Paulo because based on ZuxingaEUR tm s investigation PauloaEUR tm s project was not practical at all But Zuxing didnaEUR tm t think too much about it To his surprise not long after ZuxingaEUR tm s family came back to the States Paulo wrote a scathing e mail to ZuxingaEUR tm s senior pastor to spoke evil of Zuxing behind his back and the senior pastor forwarded the e mail to Zuxing and asked him to give some explanations It was a big spiritual event and crisis for him Zuxing felt shamed insulted personally threatened devalued and he was tempted to defend and vindicate After struggling for a few days Zuxing chose not to fight back but to communicate directly with Paulo who had become reactive and combative He wrote an e mail to Paulo in which Zuxing expressed his respect toward Paulo and he honored his dignity and face Surprisingly PauloaEUR tm s attitude toward Zuxing flipped by 180 degrees He apologized to Zuxing and spoke well of him in front of ZuxingaEUR tm s senior pastor The wall came down Conflict was perfectly resolved **Casimir Effect 50 Years Later,the - Proceedings Of The Fourth Workshop On Quantum Field Theory Under The Influence Of External Conditions** Michael

Bordag,1999-04-01 This volume contains papers based on talks delivered at the Fourth Workshop on Quantum Field Theory Under the Influence of External Conditions This series of workshops held at the Institute for Theoretical Physics of the University of Leipzig was launched in 1989 The present meeting took place 50 years after Hendrik B Casimir discovered the effect named after him This effect was found by Casimir in investigating the retarded long range van der Waals forces in colloids and re expressing them as a change in the vacuum energy of the electromagnetic field The story of why this work was done was told by Casimir himself at the workshop A historical account of the development of vacuum energy in quantum theory starting from Planck s half quanta was given by H Rechenberg Another interesting topic was about a possible explanation of sonoluminescence as a dynamical Casimir effect Kim Milton reported on the work done by Julian Schwinger on this topic during the last years of the great physicist s life as well as on his own research M Bordag Leipzig provided a general analysis of the ultraviolet divergences of the vacuum energy of a dielectric sphere The Casimir effect had been experimentally verified 10 years after its discovery on a rather qualitative level Only last year and in another experiment this year it became also quantitatively well established It turned out to be of unexpectedly high sensitivity with respect to the presence of the so called fifth forces as V Mostepanenko showed in his talk Modern methods of computing the Casimir effect rely on zeta functional regularization and heat kernel expansion This mathematical background together with a broader embedding into expansions of various spectral quantities was the subject of the talk by S Fulling Recent progress in the computation of the heat kernel coefficients was reported by V Kornyak and K Kirsten A number of talks were devoted to magnetic background fields of various types for instance new trends in the Aharonov Bohm effect In cosmology negative energy densities and the role of adiabatic vacuum states in a de Sitter universe were discussed **Hearing** Stanley A.
