Mergers in Higher Education Leon Cremonini, Saeed Paivandi, K.M. Joshi, 2019-05-23 The merger is broadly understood as a fusion of two or more units into one The merger in higher education has received much attention by policy makers as well as individual institutions in many countries as a means to bring higher education reforms The merger of higher education institutions is a visible phenomenon in the recent past but each merger provides a distinctive instance of major strategic change Besides this each merger also shows a distinct set of circumstances actors and characteristics The aims of the mergers have been varied across the nations that include a reduction in fragmentation of institutions economies of scale enhanced efficiency enhanced quality etc Along with disapproval a great amount of literature surrounding the benefits of the merger has emerged over the period of time In spite of ample literature on mergers of higher education institutions there does not appear to be a clear set of financial efficiency or quality parameters to assess the success The majority of the discussions have been narratives In the available literature the mergers have been classified based on their participants stakeholders nature the strategy that drives them their motivation and or the resultant degree of absorption This book discusses the merger experiences and case study of different countries in terms of policies and practices Each country chapter in the above context narrates that in planning the mergers what have been the philosophical economic political legal and cultural implications How the factors such as institutional history geographical distance provincial tradition state regulations the presence of collective bargaining and pertinent financial matters shaped the process as well as the outcome of the mergers The idea of merger and its implementation including process at both government and institutional level have been discussed The outcome assessment also forms the part of the discussion

ICICKM 2016 - Proceeding of the 13th International Conference on Intellectual Capital Knowledge Management & Organisational Learning Scott Erikson,Helen Rothberg, Proceedings of the 13th International Conference on Intellectual Capital Knowledge Management Organisational Learning held at Ithaca College NY USA on 16 17 Septemeber 2016 Technical Universities Lars Geschwind,Anders Broström,Katarina Larsen,2020-08-28 This Open Access book analyses the past present and future of the technical university as a single faculty independent institution The point of departure is a view of changing academic realities through which the identity as a technical university is challenged and reconstituted More specifically the book connects the development of technical universities to changes in the structure and dimensioning of national higher education systems to changes in the disciplinary basis of academic research and to changes in the governance of higher education institutions Introduced in the age of industrialization polytechnical schools rose to prominence in many national settings during the second half of the 19th century Over time new technologies have been developed and incorporated into the repertoire and waves of academisation have swept over the former polytechnics transforming them into technical universities Their traditions and brands however prevail Several technical universities are included among the most prestigious academic institutions of their nations and the training of engineers and engineering research still enjoys a high level of prestige and national priority e g in the context of innovation and industrial policy But the world keeps changing and the higher education sector with it Will technical universities have an equally attractive position within university systems in the decades to come *Reconfiguring National, Institutional and Human Strategies for the 21st Century* Leon Cremonini,John Taylor,K.M. Joshi,2022-06-22 This book addresses policies and strategies on internationalization across very different higher education systems globally including inter alia from South America Asia and Africa The volume zooms in on the interplay between the national institutional and human levels of internationalization The latter is especially novel in that it pays particular attention to how internationalization shapes individuals rather than only to the effects on student learning or research productivity The work

expounds on a the role of internationalization in fostering ethical forms of integration and preparing citizens to engage in dialogue across those differences b the possible trade offs between private benefits and negative social effects and c the contribution of internationalization to a global community of minds By discussing the human dimension it becomes clear how internationalization can contribute to defining unique ways to confront today s societal challenges Moreover as the world is facing unprecedented challenges in the wake of the coronavirus a specific chapter examines how the pandemic has made diversity among different student groups more explicit and what implications this holds for the globalisation of higher education A range of methodologies was adopted including qualitative case studies and interviews and quantitative e g surveys The book draws on both strategic frameworks and research projects to provide new perspectives on how internationalization plays out especially linking strategies with human impacts

Witoszek,Atle Midttun,2018-04-17 The Open Access version of this book available at <https://www.taylorfrancis.com/books/e/9781351765633> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license In the 21st century Norway Denmark and Sweden remain the icons of fair societies with high economic productivity and quality of life But they are also an enigma in a cultural evolutionary sense though by no means following the same socio economic formula they are all cases of a non hubristic socially sustainable modernity that puzzles outside observers Using Nordic welfare states as its laboratory Sustainable Modernity combines evolutionary and socio cultural perspectives to illuminate the mainsprings of what the authors call the well being society The main contention is that the Nordic uniqueness is not merely the outcome of one particular set of historical institutional or political arrangements or sheer historical luck rather the high welfare creation inherent in the Nordic model has been predicated on a long and durable tradition of social cooperation which has interacted with global competitive forces Hence the socially sustainable Nordic modernity should be approached as an integrated and tightly orchestrated ecosystem based on a complex interplay of cooperative and competitive strategies within and across several domains normative cultural socio political and redistributive The key question is Can the Nordic countries uphold the balance of competition and cooperation and reproduce their resilience in the age of globalization cultural collisions the digital economy the fragmentation of the work life division and often intrusive EU regulation With

Politics, Policy, and Public Options Ganesh Sitaraman, Anne Alstott, 2021-07-01 A public option is a government provided social good that exists alongside a similar privately provided good While the public option is typically identified with health care policy public options have been a longstanding feature of American life in a variety of sectors ranging from libraries to swimming pools Public schools for example coexist alongside private schools However there is surprisingly little research on public options as a general category Rather over the last few decades considerable scholarly and popular efforts to ensure access to important social goods have focused on market subsidies like vouchers or privatization which both face increasing criticism Uniting scholars from across disciplines this volume delves into the theory of the public option explores several important case studies and shows how public options could be a corrective to the trend toward privatization and subsidies This title is also available as Open Access on Cambridge Core
