University Private Admissions 2015 16:

Emerging Dynamics in the Provision of Private Higher Education in Africa Wondwosen Tamrat, Damtew Teferra, 2024-05-29 This edited book examines the private higher education PHE sector in African countries. Reports suggest that private institutions across the continent outnumber their public counterparts yet there has been little scholarly investigation into this emerging phenomenon. The book therefore seeks to document and analyse key trends and contemporary themes in the PHE sector as well as chart historical developments, policy and regulatory frameworks. As a whole, it provides the reader with in-depth knowledge, rich perspectives and robust analyses from leading authorities in the field. Contributions from all sub-regions combine thematic issues with shaping discourse on the topic and the discussions are undertaken in the context of global perspectives. The book will be of interest to academics, researchers, postgraduate students, policy makers, analysts and development partners interested in African higher education and PHE in particular. *Prospects and Future Tasks of Universities* Austrian Council for Research Development, 2017-09-12 Universities are undergoing an extraordinary transformation. Private Education In Singapore: Contemporary Issues And Challenges Choon-yin Sam, 2017-05-23 Not much has been written about the private education sector in Singapore despite the fact that the sector houses about 300 private education institutions (PEIs) and enrolls about 150 000 students. *Private Education in Singapore: Contemporary Issues and Challenges* is an exciting book that aims to fill a gap in the literature. In the book, the author offers an extensive discussion on: i) the key elements of the sector, types and features of the PEIs; ii) the regulatory framework for private education; iii) students' aspiration and the impact of the ASPIRE report on PEIs; and iv) the provision of external degree programme through transnational partnership. The book also tackles the hotly debated discussion in relation to academic quality and standard of PEI courses. The author identifies the reasons some of them have more characteristics of a myth and suggests a number of ways to overcome the issues and challenges.

Mulinge, N. Arasa, 2017-05-05 This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students involvement in governance processes and decision making Data were collected

from members of the student community utilizing a structured self administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University representing the public sector and the United States International University representing the private sector The guiding argument for the study was that shared governance one of the principles of good governance is critical in enabling the universities to deliver their visions and the missions effectively The results revealed that while in principle Kenyan universities have embraced democratic governance in which all stakeholders including students have a role to play in practice they continue to violate the core principles of good governance particularly shared governance Specifically students who are major stakeholders in university education are largely excluded from significant structures of governance thereby limiting their influence and participation Although their representation is mainly provided via student self governance organs unions associations and or councils their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors Student active involvement in decision making is mainly confined to lower levels such as the school faculty and departmental programme The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya

The Abundant University Michael D. Smith, 2023-09-19 Why our current system of higher education is financially and morally unsustainable and how to address the crisis with the creative implementation of digital technologies For too long our system of higher education has been defined by scarcity scarcity in enrollment scarcity in instruction and scarcity in credentials In addition to failing students professionally this system has exacerbated social injustice and socioeconomic stratification across the globe In The Abundant University Michael D Smith argues that the only way to create a financially and morally sustainable higher education system is by embracing digital technologies for enrolling instructing and credentialing students the same technologies that we have seen create abundance in access to resources in industry after industry The Abundant University explains how we got our current system why it is such an expensive inefficient mess and how a system based on exclusivity cannot foster inclusivity Smith challenges the resistance to digital technologies that we have already seen among numerous institutions citing the examples of faculty resistance toward digital learning platforms While acknowledging the understandable self preservation instinct of our current system of residential education Smith makes a case for how technology can engender greater educational opportunity and create changes that will benefit students employers and society as a whole
