

HANDOUT: UNPACKING LEARNING COMPETENCIES

1. Unpacking Competencies using 5 P's:

a. Define the Term "Unpacking" and "Competencies"

- **Unpacking:** Unpacking refers to the process of breaking down complex educational goals, often expressed as competencies, into specific, manageable components, such as learning objectives or tasks.
- **Competencies:** Competencies are the overarching knowledge, skills, and abilities that students are expected to acquire. In the context of science education, competencies may include understanding scientific principles, conducting experiments, analyzing data, and applying scientific knowledge to real-world problems.

b. 5 P's for Unpacking Competencies:

- **Purpose:** Define the purpose of the competency or learning goal. What do you want students to achieve? What is the desired outcome?

Example: Purpose in Science Education

- Competency: "Understand the scientific method."
 - Purpose: To enable students to apply the scientific method to investigate and solve scientific problems effectively.
- **Preparation:** Determine the prior knowledge and skills required for students to attain the competency. What background knowledge do students need to possess?

Example: Preparation in Science Education

- Competency: "Analyze ecological systems."
 - Preparation: Students should have a basic understanding of ecosystems and environmental concepts.
- **Pitch:** Describe the level of depth and complexity expected. How challenging should the learning be for students?

Adam Haigler,Ben Owens,2018-12-07 Would you rather people saw you as open or closed minded The answer should be obvious Why is it then that we tend to allow our legacy systems in education to be closed when they clearly don t enable the same level of performance as open ones This phenomena is well established in education where many educators tend towards isolation in fighting and hoarding resources from each other Meanwhile students often have lack a clarity of purpose in terms of how what they are working on relates to things they care about in the wider world Stuck inside an unengaging status quo many students see doing school as irrelevant to their interests and ambitions This book is the antidote to this closure from the classroom to system wide policy It is a call to action for educators who want to become relentless collaborators networked with professionals in and outside the school They are then poised to quicken the pace of innovation through accessing the endless supply of free knowledge available to them This is the definitive resource on how to create an Open Way Learning ecosystem in your school district or region **Competence Management and Competitive Product Development** Alexander Chursin,Andrey Tyulin,2018-03-06 This monograph provides theoretical and practical perspectives on competency
