Picturing Citizenship Fay Anderson, Jane Lydon, Melissa Miles, Amanda Nettelbeck, 2025-07-24 For many the conditions and privileges of citizenship and the access it provides to equal civil political and social rights are taken for granted Yet citizenship always implies histories of inclusion and exclusion and in settler nations with colonial roots the history of citizenship is entangled with the legacies of colonisation Looking beyond its legal definition to the wider historical processes through which citizenship and its associated ideas of rights and belonging have been imagined debated and found lasting form this collection considers the unique role of visual culture in defining contesting and advancing ideas of citizenship in settler national contexts from the 19th century to the present day Addressing citizenship's particular entanglements with colonial histories in contemporary settler nations the collection considers how images have shaped the meanings and experiences of citizenship from the colonial era through periods of mass global migration to contemporary geopolitical change and debates on Indigenous rights and recognition Contributors explore the role visual culture has played in imagining or interrogating ideas about belonging rights civic identity and the ideal citizen in societies that continue to grapple with their settler colonial origins They ask how image making may be used to negotiate or contest the limits of citizenship whether as a legal or as an imagined cultural category and the role of visual culture in building relationships between citizens non citizens and the state This collection will provide a new and compelling history of citizenship and the ways it has been defined not only by historicising citizenship's visual imagery but by exploring its present effects and legacies

dargestellt **Innovative Computational Intelligence: A Rough Guide to 134 Clever Algorithms** Bo Xing, Wen-Jing Gao, 2013-12-13 The first notable feature of this book is its innovation Computational intelligence CI a fast evolving area is currently attracting lots of researchers attention in dealing with many complex problems At present there are quite a lot competing books existing in the market Nevertheless the present book is markedly different from the existing books in that it presents new paradigms of CI that have rarely mentioned before as opposed to the traditional CI techniques or methodologies employed in other books During the past decade a number of new CI algorithms are proposed Unfortunately they spread in a number of unrelated publishing directions which may hamper the use of such published resources These provide us with motivation to analyze the existing research for categorizing and synthesizing it in a meaningful manner The mission of this book is really important since those algorithms are going to be a new revolution in computer science We hope it will stimulate the readers to make novel contributions or even start a new paradigm based on nature phenomena Although structured as a textbook the book s straightforward self contained style will also appeal to a wide audience of professionals researchers and independent learners We believe that the book will be instrumental in initiating an integrated approach to complex problems by allowing cross fertilization of design principles from different design philosophies The second feature of this book is its comprehensiveness Through an extensive literature research there are 134 innovative CI algorithms covered in this book Evidence-based Public Health Ross C. Brownson, Elizabeth Anne Baker, Anjali D. Deshpande, Kathleen N.

Gillespie, 2018 The acclaimed textbook for navigating the practice and challenges of public health now updated and completely revised It should be recommended or assigned to all students in public health American Journal of Epidemiology This fully revised and updated edition Evidence Based Public Health offers an essential primer on how to choose carry out and evaluate evidence based programs and policies in public health settings It addresses not only how to locate and utilize scientific evidence but also how to implement and evaluate interventions in a way that generates new evidence

Cognitive Multitasking - Towards Augmented Intelligence Yew Soon Ong, Liang Feng, Huajin Tang, Will Neil Browne, 2021-03-04 *The New Public Health* Theodore H. Tulchinsky, Elena A. Varavikova, 2009 Linking classical public health and intervention with evolving healthcare strategies and policies for the 21st century The New Public Health provides a broad perspective on current issues the kinds of solutions expectations needed in the future *Resourceful Reading* Katherine Bode, Professor Robert Dixon, 2010-01-11 This collection provides the first comprehensive account of eResearch and the new empiricism as they are transforming the field of Australian literary studies in the twenty first century
