Veterinary Public Health: Veterinary Medicine's Current Challenges in a Globalised World Diana Meemken,Ivan Nastasijevic,Reinhard Fries,Suporn Thongyuan,2025-03-21 The transfer of zoonotic agents leading to diseases and epidemics is well known as well as the role played by human activity in the transmission of such agents Veterinary Public Health VPH has an essential role keeping transmissible diseases under control and it involves different disciplines and the application of different techniques VPH has generally a local and regional focus in sample collection Disease s detection may be limited to specific areas Despite this aspect of VPH the importance of exchanging data discoveries and information cannot be

overlooked due to the everchanging landscape in global trade transboundary diseases and extended animal movements On a local scale VPH needs often to face different challenges starting with the infrastructures for live stocks down to optimization using new technologies as Artificial Intelligence There are instances where veterinary services are not readily available and temporary solutions need to be found as for example paraveterinary services The latter should be guaranteed by adequate professional training along the different stages of as an example the food chain production Given the transboundary nature of zoonotic agents and diseases in the last decades the One Health approach has emerged as a new and holistic approach to incorporate the different facets of Veterinary Science To strengthen this approach veterinary training should eventually dedicate more attention to public health and to preventive measures of zoonosis and epidemics This renewed focus will also have the additional benefit of defining more clearly the discipline of VPH Human Public Health with the same philosophy should include the animal ecosphere emerging diseases and zoonoses focusing on the Human Animal Interface **Subject**
