Higher Education Transformation in Africa Emnet Tadesse Woldegiorgis, Logan Govender, Dennis Zami

Atibuni, 2024-11-05 This book critically interrogates the notion of transformation in higher education focusing on epistemological and structural issues in postcolonial and contemporary Africa. The book considers the multifaceted challenges facing higher education in the continent and uses the concept of transformation as a common thread weaving through a range of issues including epistemology, identity, relevance, research, collaboration, and decoloniality. Arguing for a holistic approach towards progressive and innovative education systems, the book calls for a fundamental transformation that expands access, enhances quality and competitiveness, addresses past injustices, and improves the capacity to act together for a more sustainable and just future. Overall, the book makes a powerful case for the power of transformation in higher education to shape the social, economic, and cultural fabric of society. This book's critical evaluation of knowledge production in Africa will be an important read for researchers and policymakers involved in Africa's higher education sector.

Transformation of Higher Education Institutions in Post-Apartheid South Africa Chaunda L. Scott, Eunice N.

Ivala, 2019-02-21 This book outlines successful transformation strategies and efforts that have been developed to assist the South African higher education system in moving beyond its post-apartheid state of being. Through case studies authored by South African higher education scholars and scholars affiliated with South African institutions, this book aims to highlight the status of transformation in the South African higher education system, demonstrate the variety of transformation initiatives used in academic institutions across South Africa, and offer recommendations to further advance this transformation. Written for scholars and advanced students of higher education in international settings, this volume aims to support quality research that benefits the demographic composition of South African academics and students and offers lessons that can inform higher education transformation in similarly multicultural societies.

Transforming Universities in South Africa, 2020-08-31 The idea of transformation in higher education underpins all policy documents, academic literature, and ongoing debates in South Africa. *Transforming Universities in South Africa: Pathways to Higher Education Reform* responds to the pressing need to comprehensively review the post-apartheid experience and assess where South Africa's higher education stands across the continent and globally, particularly within the country's efforts to overcome decades of socio-economic imbalances. It addresses the question of whether South Africa's transformation strategy from apartheid to democracy was simply a symbolic new flag-raising and new anthem-singing exercise reflecting a transition

akin to those limited decolonization projects elsewhere in the world or whether something more fundamental was possible and was achieved with political and policy implications for other countries in Africa and globally This volume s ultimate purpose is to provide a basis for imagining new futures in which South Africa higher education in the context of Africa and the global world takes centre stage

Becoming a teacher Josef de Beer, 2020-12-31 This book disseminates original research on learning in and from practice in pre service teacher education Authors such as Lederman and Lederman describe the student teaching practicum or work integrated learning WIL which is an essential component of pre service teacher education as the elephant in the room These authors note that the capstone experience in any teacher education programme is the student teaching practicum after all this is where the rubber hits the road However many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher This is the gap that this research book addresses Most of the chapters in the book report empirical data with the exception of two chapters that can be categorized as systematic reviews WIL is addressed from various angles in the chapters Chapter 6 focuses on research related to what makes Finnish teacher education so effective and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school based on Finnish insights in Johannesburg Chapter 3 highlights the challenges faced in open and distance learning teacher education contexts Several of the chapters disseminate research

findings on alternative interventions to classic WIL namely where safe spaces or laboratories are created for student teachers to learn and grow professionally These could either be simulations such as software programmes and avatars in the intervention described in Chapter 2 student excursions as the findings in chapters 5 7 and 10 portray or alternative approaches to WIL e g Chapters 11 and 12 The book is devoted to scholarship in the field of pre service teacher education The target audience is scholars working in the fields of pre service teacher education work integrated learning and self directed learning The book makes a unique contribution in terms of firstly its extensive use of Cultural Historical Activity Theory as a research lens and secondly in drawing on various theoretical frameworks Both quantitative and qualitative research informed the findings of the book
